

Brighten Up

WITH
**SHERWIN-WILLIAMS
PAINTS & VARNISHES**

There is no season of the year so fitted for Brightening Up as the present. There is no better way to improve the appearance of your house inside or out than by the use of paints and varnishes. By keeping your house well painted it will last longer and look better.

Sherwin-Williams Paints and Varnishes are the greatest help in housecleaning. By touching up the shabby spots in the house, such as floors, furniture, woodwork, with paint or varnish or stain the house can be made to fairly shine inside. Housecleaning will give more satisfaction than ever before if Brighten Up Finishes are used.

We are agents for Sherwin-Williams Paints and Varnishes and will be glad to give you figures on "Brightening Up" your place, inside or out. Come in and talk the matter over.

You will be surprised at the results that can be secured with very little expense by the use of these products. Come in and talk the painting question over today.

Five Dollars Free

Get a card with every \$1.00 purchase and participate in the clock drawing April 16th. Our plan is to give direct to our customers some of the money we have been spending for advertising. We have a clock in our window which will be wound up and allowed to run down each week. The card you get with each purchase has the time of day stamped thereon. Bring the card to our store on Saturday at 3 P. M. and the one holding the card with figures nearest the correct time the clock stopped gets \$5.00 in cash. Save all your cards for the final prize in June.

Cheap Paint

Just let us say a word about the 95 cent per gallon paint which many people are tempted to order from Chicago because of the seemingly low price.

People nowadays come pretty near getting what they pay for and this is particularly true when it comes to buying paint material. The jobbing (that is the wholesale) price of Linseed Oil today is 75 cents per gallon and pure lead is \$8.00 per hundred pounds. It takes 20 lbs. of lead to one gallon of oil to make the regular lead and oil mixture used by all first class painters. Here is 75 cents for oil and \$1.60 for lead or a total cost of \$2.35 for about a gallon and a half of best quality lead and oil print. Remember these are wholesale figures on lead and oil produced on this Coast without the addition of freight charges.

Now how can they sell you paint in Chicago for 95 cents? It's easy if you know how. They use a cheap oil (even though oil is the life of good paint) and not enough white lead to flag a bread wagon. A mineral body costs about two cents per pound instead of 8 cents and it is therefore easy to make a profit of 20 per cent on this 95 cent per gallon paint where the legitimate dealer on this Coast is well satisfied with a profit of 10 per cent on all lead and oil sales.

When you pay 20 or 24 cents per gallon freight, and this is what it should cost unless it is under weight because of a very thin cheap dope, then your cost runs up to \$1.15 or \$1.20 per gallon and we have stacks of Sherwin-Williams paint that will beat it at every turn in the road for this price. To be sure it is not S & W regular house paint made of lead, oil, etc., but it is S & W creosote paint and we guarantee the wearing qualities. We might add that one gallon of Sherwin-Williams paint will cover 25 to 40 per cent greater surface than any of these cheap paints and will outwear them from one to three years.

As stated in the beginning, we get what we pay for, although looking at the 95 cent price without taking anything else into consideration, one would naturally think the high grade paints were over priced but the real facts are the per cent of profit on high grade paints is less than the average dealer makes on the low grades.

Shingle Stains

S-W Preservative Shingle Stains are made with Creosote Prepared ready for use for exterior of buildings, roofs, etc. The idea of combining Creosote with paint originated with the Sherwin-Williams Co. and they have valuable special knowledge in the production and use of Linseed Oil which has aided them in making a beautiful line of shingle stains strong in staining powers, permanent and effective. S-W Shingle Stains will cover on an average surface, about 160 square feet to the gallon if brushed, or 2 1/2 to 3 1/2 gallons will stain 1000 ordinary shingles as a dipping coat for usual laying.

S. W. P.

The Sherwin-Williams Paint Prepared (S. W. P.) is our standard paint for outside uses. This paint has been on the market nearly forty years and each year has seen largely increased sales and a wider distribution of well pleased users. Property owners in and around Oregon City have demanded a high quality paint. We realized at the start that the only way we could hold their trade year in and year out would be to stock up a standard and widely advertised product that would give absolute satisfaction—that would not only wear and look well, but that would also be most economical in the long run. Our steady sales of S. W. P. have proved without a doubt that we were right. The

Sherwin-Williams Co. own five large paint and varnish factories; own and operate their own lead and zinc mines; have sales offices and warehouses as well as traveling representatives in every part of the civilized world. They are thus in an excellent position to put out a product like S. W. P. It is ground in mills of their own design, they control the source of practically all the raw materials entering into its manufacture and are thus able to safeguard its quality from the very start. All in all, S. W. P. is the best prepared paint we know of. It will cover the most surface, wear longest, look best and cost less per job than any other prepared paint on the market. We recommend it to you for use on your houses, outbuildings, and surfaces requiring a good, durable finish. Comes in 48 handsome shades.

An Edison Phonograph

ON TEN DAYS FREE TRIAL

If after using it 10 days in your own home, you decide not to keep it; bring it back and there will be no charge of any kind. If you decide to keep it; you may have 8 months in which to pay for it; and also you pay only the cash price, \$25.00—not a cent extra for the entire time.

We will include with the machine 12 of the most popular records at 35 cents each; a total of \$5.20. Also bottle of oil and oil can without charge.

Nobody in the United States can beat that price if you paid all the money down; and then you are dealing at home where our machine can be looked after without expense to you; where it is convenient to make payments and where you will be treated fairly if you have to pass up a payment at any time.

If you prefer a Victor to an Edison, we will let you have one on the same easy terms. Send a post card today and ask for catalogs and full particulars. We carry in stock machines from \$10.00 to \$200.00.

S-W ARSENATE OF LEAD

This is a form of insecticide which is particularly adapted to the use of horticulturists and growers of small fruits. It stays well on the foliage and is especially effective against the pests which infect this kind of vegetation. Arsenate of Lead must be made with extreme care or else the arsenate in it will burn or blight the foliage. Sherwin-Williams Arsenate of Lead can be depended upon not to injure vegetation. Put up in convenient sized packages, full net weight. It is absolutely safe and sure. It contains the maximum amount of arsenic, is extremely soluble in water and mixes readily with Bordeaux and other mixtures. It is extremely light in gravity, remaining well in suspension in the tank, thus allowing a uniformly poisonous spray to be thrown from the finest nozzles. It will not dry out or lose its strength in the package—a trouble which makes many goods lose their effectiveness by the time they are used. Sherwin-Williams Arsenate of Lead is being used with unusual success by many prominent horticulturists and fruit growers, and you can be sure of the most satisfactory results from its use.
