Those who have news for the Milwaukee Enterprise should either mail it to the Milwaukee Editor of the Enterprise at Oregon City or leave it at the real estate and insurance office of A. H. Dowling in Milwaukee, or with Justice of the Peace Kelson.

MILWAUKEE.

The city council of Milwaukee held its regular monthly meeting in the Milwaukee city hall last Tuesday evening. Mayor Streib, and Councilmen W. F. Lehman, I. Mullin, T. R. A. Sellwood and John Kelson being present. The council chamber was filled by local citizens interested in the franchise question. The street committee reported that the property owners along Patton avenue had voluntarily consented to the opening of that street. An order passed at the last meeting of the council to have the street opened by condemnation proceedings was rescinded.

Mr. Morrow, representing the Southern Pacific Company, was on hand to urge action towards the franchise asked for by the Beaverton & Willburg railroad. He informed the council that after consulting with the management of the company, they positively would refuse to consider paying any money as damages nor would they agree to build a depot such as the council might ask in return for a franchise. He believed the company had a right to condemn a right of way should the council refuse to grant it.

Mayor Streib read a letter he had received from A. M. Crawford, Attorney-General of Oregon, in which Mr. Crawford gave his opinion that the company could force a right-of-way under certain conditions, but that the municipality has the right to demand damages. A letter from Attorney R. R. Giltner, of Portland, to the effect that the company could not condemn a right-of-way was also read. Mr. Morrow finally assured the council that the company would not take so drastic a step.

Councilman Mullin accused Mr. Morrow of bad faith in not presenting plans at this meeting. Mayor Streib called attention to the report of the State Railroad Commission with reference to the poorly constructed and inadequate depots on the S. P. line in this state, as compared with the splendid depots on the O. R. & N. line in Idaho. Mayor Streib in state in his views said: "Milwaukee should have a depot that will be a credit to the town for all time to come and it is now up to the S. P. Company to show if it means business or not. Unless a substantial depot is guaranteed, no franchise will be granted."

A few years ago Milwaukee had a depot on the main line of the S. P., but the company loaded it on a flat car one day and took it away, according to Councilman Kelson. Before he would vote on a franchise, the size of a depot would have to be determined in advance, he said.

The council will hold an adjourned meeting Tuesday night, April 20, in order to give the company more time in which to consider the depot matter and draw up plans for the council's approval.

Seeing Doan's Kidney Pills advertised, I procured a box at Huntley Bros. drug store and when I had used half the contents my condition was greatly improved, but I used the entire box to make sure of the beneficial effects. Kidney trouble has now entirely disappeared from my system and I give Doan's Kidney Pills my highest recommendation."

WHEEZER OR SNEEZER.

Have You Heard of Hyomei for Cough, Asthma and Hay Fever.

If you wheeze or sneeze, hawk or spit, snuffle or blow, something is the matter with the membrane of your respiratory tract, and you need Hyomei.

And you need Hyomei because it will cure you of any catarrh or inflammatory condition that exists. It isn't a stomach medicine, or spray, or douche, but a very pleasant, healing, antiseptic balsam, from the eucalyptus forests of Australia. You breathe this balsamic air through a small, hard rubber inhaler, and it reaches every nook, corner and crevice of the membrane, and promptly kills the catarrh germs.

Huntley Bros. Drug Co. will sell you a complete Hyomei (pronounced High-o-mei) outfit for \$1.00, on the money back plan.

"The use of Hyomei cured Mr. Cutler of catarrh in 1904. He has strongly endorsed the use of Hyomei in many instances, and we are glad to go on record regarding this marvelous catarrh cure, and endorse it."—Mrs. A. Cutler, 201 Post Ave., Battle Creek, Mich.

A REVOLUTION IN THE MANUFACTURE OF POWDER.

The first man to use powder and to educate the people of the state in the clearing of stump lands is Mr. K. McFarland, who has been demonstrating his work for a number of years, and has tried various powders. Mr. McFarland was called upon by the Trojan Powder Company, a new company in the field, to demonstrate the superior strength and safety of their powder, and after a thorough testing, found it to be no superior that farmers and supervisors throughout the country in their clearing work, do not care to even experiment with other grades of powder on the market at the present time.

Some years ago Mr. McFarland secured the composition of a stick powder which was copied by all the powder companies of this country; this explosive did the work then to the satisfaction of users generally, but it had its disadvantages, its acids and attending headaches, and freezing qualities had to be overcome. It has been the aim of the Trojan Powder Company to provide an explosive that would do away with all these disagreeable features, and the result has been most gratifying in the production of a stump, rock and mining powder that does not contain nitro-compounds, nor acids with very little smoke and will not produce headaches, and one that discounts them all for strength and safety.

This is a much sought for commodity. As it does not freeze, the great loss of life from heating or thawing is utterly eliminated. It is a revolution in the powder industry, and there can be no recommendation stronger than the company is at present putting out, which is a challenge to the Powder Companies of this nation to send their representatives in competition with it, to demonstrate its strength, superiority and safety of the different blasting powders being manufactured today.
