The first circus to ever visit Canby was on Tuesday, when the Frank Adams Great Southern Shows pulled into the depot attached to the rear of a freight train. Two cars carried the paraphernalia of the company. A parade was advertised to take place at 2 o'clock, and many people gathered along the streets and waited patiently for the parade to start. A band composed of five pieces, played selections to the delight of the hearers. This took place near the main entrance. One of the chief attractions was the tight rope walking from the top of the tent. Several clowns amused the young folks inside the tent, and a few other attractions drew a fair sized audience both afternoon and evening. A goat that was with the company, created all kind of excitement on the street by keeping the crowd moving. "Hilly," as he was called, did his best to butt the people into the big tent, but many of the onlookers preferred to remain outside and hold onto their change for the horse races Saturday. The show company had with them an elephant, Shetland ponies, and several animals.

She is now a patient in the Good Samaritan hospital in Portland suffering from a dislocated shoulder and a compound fracture of the two bones of her forearm. The accident occurred when her father went after the cows she climbed up back of him as had been her custom for many weeks and with her arms around him rode out into the fields. Although the horse did not go any faster than usual in some manner the little girl got frightened and losing her grasp fell to the ground. BOOST CLACKAMAS

You May Get a Prize For Doing It. Boost, Boost, Boost!

Write a brief presentation of interesting facts which people in other states ought to know concerning Clackamas County. Its attractions and advantages as a residence or business and send your essay to S. P. Davis, secretary of the Publicity Department of the Oregon City Commercial Club in time to reach him by Saturday, June 5, and you may do something for your county and at the same time have a chance to win one of the three prizes which are offered for the three best contributions received.

The first prize will be an enlarged and beautifully colored photograph of the Willamette Falls at Oregon City, ready framed, made by Mr. Davis himself and of value \$25.00. A copy of it may be seen at the rooms of the Commercial Club, a somewhat smaller one, in George Harding's drug store. This beautiful picture will go to the person whose production the committee may regard as the best.

The second prize will be a similar picture without a frame. Cut.

The third will be an enlarged photograph of the Falls in plain black and white—without the colors.

Brevity is required. Nothing longer than two pages of foolscap would likely be used. Write on only one side of the sheet. Do not try to tell all the good things that might be said about this glorious country, but restrict yourself to that about which you can say the most interesting things, whether it is our climate, scenery, products or something else which may interest and attract readers elsewhere—for the best of these papers will be published.

Any resident of Clackamas County, old or young, male or female, may have part in this contest, excepting those pupils in the Oregon City schools to whom another offer has been made.

S. P. DAVIS, Commercial Club, Oregon City, Or.

**McCormick Machines**  
... Insure a Successful Harvest ...

McCORMICK mowers embody all the excellent features of McCormick construction and are made in various styles and sizes to meet all requirements. There is the New Big 4 with its wide cut for extensive fields, and the Little Vertical Lift for the large lawns or small fields where trees and shrubbery are to be found. For fields that are full of stumps and stones, the Vertical Lift mower is unsurpassed. The noiseless, smooth cutting McCormick mower is the machine to buy.

Numerous excellent features are found on McCormick hay rakes, among which are: heavy rake head, best quality spring steel teeth, substantial, interchangeable wheels, protected ratchets, and removable boxes in hubs. These rakes are equally suitable for raking hay from the swath, or bunching from the windrow. Made in either self-dump or hand-dump style. For durability and quality of service, McCormick hay rakes are unsurpassed.

A successful harvest consists of gathering all the grain, no matter what its condition, with the least possible delay and expense. McCormick binders cut all conditions of grain easily and rapidly, and bind it into neat, compact bundles for future handling. Under all reasonable conditions the McCormick will never necessitate any long delays for repairs and thus insure the entire crop. The machine is so simple in construction and easy to operate that it can be relied upon to do the work at all times.

The hay tedder is now recognized as being indispensable to the proper handling of hay. It is a great time saver, because tattered hay will cure quicker than untended hay. It is also a hay saver in case of weather. McCormick tedders are constructed with the same care that characterizes all machines of this notable line, and have become general favorites wherever hay is grown. Steel frame, steel wheels, steel forks, and the positive and uniform gear drive, make McCormick tedders durable and extremely efficient.
