William Gleisy returned this week from Toledo and Newport where he had been spending a week or two on a vacation. The Christians renting the yard of Antonio Will has started hockpicking already. The yard is situated on high ground and the crop has ripened very this season. Tom and Willie, the tent revivalists, are meeting with good success in Aurora and are well liked among the people here; they are good speakers and the people all turn out to hear them preach. Mrs. Preston, of this place, died recently at the age of 54 years. She had lived in Aurora about five or six years and was well known here. W. P. Wooster, the Aurora butcher, left for Silette, Lincoln County, to buy cattle for the local market. Two cars will be purchased and brought to this place. Dave Ross and wife, of Toledo, Oregon, are visiting with Mr. and Mrs. "Spike" Gleisy. Mr. Ross is thinking of settling here soon. Chas. Platz, of Hubbard, died Sunday in the Good Samaritan Hospital at Portland, age 32 years, after several days' illness. Mr. Platz was first lieutenant of the Hubbard militia and also served in the Spanish-American war. He was very well known around here and his many friends and relatives greatly deplore the loss of a good friend and brother. Mrs. G. A. Stimpkins of Barlow, and her sister, of Washington, will leave this week for Grants Pass on a visit to their parents, who reside at that place. Mr. and Mrs. John Enger, of Roseburg, visited at the home of Mr. and Mrs. Harve Hissell this week. The City of Aurora has completed the laying of 100 feet of water main as well as three new hydrants on Liberty Street. This additional water main will supply several families that have heretofore been without an ample supply and no fire protection. A new reservoir tank will be constructed in the near future, which improvement is needed greatly and the addition of which will give the city one of the best water systems in the county. Ben Will was in Canby again this week to play ball with the Reds. Henry Miller has returned from Shasta Springs, after spending several days at that place recuperating. J. Stalger, the Portland shoe man.

The local telephones are somewhat out of kilter lately and the new company will have something to do when they take charge, but they thoroughly understand the task before them and are prepared to go ahead. Mr. Waterbury of the new company, was in town Tuesday and stated that he had about forty new subscribers that will be installed as soon as the new company was ready to take charge, which will be the first of September. Reports from around Donald state that harvest is all over and the yield has proved to be all that any one could ask for. Mr. Hinman, of Portland, has bought two acres at Donald and will build a new residence in the near future. He is the father of Mrs. Lester Mathews. All of Marion and Clackamas Counties will be eventually covered by the new telephone company. This will cut out all rubbering which has always proved such a nuisance. Lewis Calahan, of the Molalla country, was a visitor in Aurora this week. This or-

chestra has been playing together only about a year and a half, but all of them are old players and can put up an article of music that any town may be proud of. Those forming the orchestra are Harry and R. Garrett, Walter Grim, trombone; Clarence Bevens, clarinet; Glen Hurst, trap drum; and J. B. Hurst, cornet. The two Garrett boys are the violinists. Fred Will Cr. and wife, of Aurora, went to Willhoit Monday for a two weeks' stay at the springs. August Kiel returned this week after a two weeks' visit to the southern part of the county. PROFIT IN MULES.

First Class Animals in Great Demand. Some Points on Breeding. The demand for first class mules at highly remunerative prices is steadily on the increase, for steady, heavy work in the cities and on the farms and plantations, says a breeder of these animals. Heavy pairs of strong, willing and well broken mules are eagerly sought for by merchants and teamsters in the big cities, and the prices range from \$350 to even as high as \$800 or more per pair. Mules of this character are more reliable than the average heavy horse. They do not tire out so quickly, are less liable to disease, and they stand the hard pavements much better. Their lasting qualities under the severe strain of heavy city work are fully double that of a horse. While they can subsist on coarser food than their cousin, the horse, I have always found it to pay to give plenty of food, and when generously treated regularly with food you can always call on them for long hours and continued hard work. When it is intended to make a specialty or regular business of mule breeding a considerable rural saving can be accomplished in the purchase of brood mares for the purpose. Even though you may have an abundant capital it is not necessary to purchase fine, young and expensive mares to breed from, but attend the sales at the horse bazaars of the large cities, provided you are a good judge of horse flesh, and if you are not then secure the services of some one who is. There are many animals which are put up for sale there and which are sold cheap because they are footsore and useless for the time or they may have some slight mechanical injury, all

The Secret of Long Life. A French scientist has discovered one secret of long life. His method deals with the blood. But long ago millions of Americans had proved Electric Bitters prolongs life and makes it worth living. It purifies, enriches and vitalizes the blood, rebuilds wasted nerve cells, imparts life and tone to the entire system. It's a god send to weak, sick and debilitated people. "Kidney trouble had blighted my life for months," writes W. M. Sherman, of Cushing, Mo., "but Electric Bitters cured me entirely." Only 50c at Jones Drug Co.

Washington Once Gave Up. To three doctors; was kept in bed for five weeks. Blood poison from a spider's bite caused large, deep sores to cover his leg. The doctors failed, then "Bucklen's Arnica Salve" completely cured me," writes John Washington, of Bosqueville, Tex. For eczema, boils, burns and piles it's supreme. 25c at Jones Drug Co.

Selecting Good Calves. A dairyman says of selecting calves: I first see if it is a strong, well built calf. The embryo udder is then examined to make sure that there are four good sized teats well set apart. Next consider the dam. Is she a good eater? Has she a good digestion? Has she a strong, well placed udder? Does her general makeup say she is the true dairy type? And, finally, does her record show her to be a persistent, profitable working dairy animal? If so, the calf is worth giving a trial. The calf is fed on food to make it grow, but not to fatten it; bulky, so as to develop the digestive machinery. Have the heifer come into profit at eighteen to twenty months old. Teach it early the way it should go, and the chances are that it will go that way. Do not condemn too early, but weigh, test and watch carefully the amount of food consumed.

Sell Out Saloon. Bennett & Moore have sold the Log Cabin saloon to Joe Kerriek, of Portland. Mr. Moore has accepted a position as foreman of the O. K. barber shop.
