Ill Health is More Expensive Than Any Cure.

This country is now filled with people who migrate across the continent in all directions seeking that which gold cannot buy. Nine-tenths of them are suffering from a throat and lung trouble or chronic catarrh resulting from neglected colds, and spending fortunes vainly trying to regain lost health. Could every sufferer but undo the past and cure that first neglected cold, all this sorrow, pain, anxiety and expense could have been avoided. Chamberlain's Cough Remedy is famous for its cures of colds, and can always be depended upon. Use it and the more serious diseases may be avoided. For sale by Huntley Bros. Co.

NOTES OF THE CITY SCHOOLS

Attorney O. D. Eby talked to the students of the Oregon City High School Wednesday morning from 9 o'clock to 10 o'clock. His talk was from the lawyer's standpoint and related to the practical business side of the lawyer's life. After defining law to be a rule of civil conduct prescribed by the legislative power he illustrated the same by reading from the session laws of Oregon for the years 1903, 1905, 1907, and 1909, the various laws enacted by the legislature at those sessions relative to trout fishing, showing how the same regulates and restrains the conduct of the people of the state of Oregon towards the catching of trout. He took up and discussed the various law making bodies, including congress legislatures, city councils, boards of school directors and so on down to the laws prescribed by parents for the family government and emphasized the necessity of obedience to all the laws by which we are governed in order to secure a proper enforcement of the same and to develop the best type of citizenship.

While discussing the subject of contract he distributed deeds, mortgages and notes among the students and explained the uses of the same by assuming to transfer real property by deed and taking a note and mortgage in part payment for the purchase price of same. He showed how a contract may be made by the house wife with the grocer or butcher by ordering goods over the telephone and how the same may be enforced in like manner as a written contract, and enlarged by giving the several steps necessary to be taken in a Justice's Court to bring suit and collect such bills, including complaint, summons and service of same, the trial including the jury, witnesses, verdict, judgment, execution and sale of the debtor's property.

In discussing the subject of criminal law he took up and defined burglary, arson, assault and battery, forgery and other crimes and showed the steps necessary to be taken in order to convict one accused of such a crime including indictment, pleading, trial, jury, witnesses, verdict and final punishment. In order to give the students an idea of practical court work he read to them the pleadings in a case recently tried in court, giving the contentions of the respective parties to the suit and showed how witnesses differ in testifying as to the facts. He closed by appealing to the students to learn to do things by being practical and not by theory, assuring them success awaits every practical man and woman who is not afraid to work.

Mr. Eby was listened to very attentively by the students throughout the talk and at the close was given a warm applause, showing their appreciation of his efforts.

ions, so as not to let the hostile tribes of Indians know how many were dead or dig up their bones.

But day by day the provisions brought from England grew less and less until they saw with dismay that it would be entirely exhausted long before their corn was ripe. They were put on such scant rations, that it is said they sometimes got no more than six grains of corn each meal.

The winter had been a very damp one, but the summer was so dry that it seemed as if of the grain would perish for the want of rain.

A day of fasting and prayer was appointed and nine hours were spent asking God to help them. Some of the Indians hearing this watched the sky and when it clouded up and began to rain they remarked the God of the Whites had heard their prayer.

It rained ten days and this assured a plentiful harvest. The Pilgrims were so thankful for this mercy that they set a day for giving thanks to God. After a solemn service they held a great feast, to which Massachusetts and ninety Indians were invited.

At this dinner they had wild turkey and pumpkin pie as they had no apples. After this "Thanksgiving Day" as they named it, a feast has been held by the Americans every year.

Now our president selects our "Thanksgiving Day," which is most generally the last Thursday in November.

The High School Glee Club held an important meeting last Wednesday evening and decided to use as the basis of their study and practice the music book entitled "The Silver Series, No. 7."

The purpose is to create in the boys and girls an interest in and a love for reading and study of history, literature, and government.

The subject of arithmetic was taken up and discussed. An earnest effort is being put forth to eliminate those parts of little value either practical or cultural and to emphasize those phases that prepare for the actual duties of everyday life, to apply it to the problems and requirements of the home, farm, store and factory, etc.

The regular tests given at the end of each six weeks period took place this week, and the report cards will be sent to parents next Wednesday noon. Parents are urged to study

these standings of their children and to cooperate with teachers in securing a high standard of work.
