IS CALIFORNIA ENTRANCE TO EARTH'S LABORATORY

Science Discovers that Paso Robles Hot Springs Are Really the Marvels of Health.

Today the great American and foreign authorities assert that the famous Paso Robles springs bring from the interior of the earth waters which make cures that medicine and surgery do not perform.
Such wonderful results have been made upon certain diseases by the Paso Robles Hot Springs that scientists are unable to account wholly for the real reason and to exactly determine what causes the really great chemical virtues of these waters.
The wonderful waters of Paso Robles have performed so many really remarkable cures of late, upon persons from all over the world, to such an extent that medical men and scientists are making an investigation into what really is the cause of such chemical purity of water and its consequent action upon health.
The waters at Paso Robles are both hot and cold when they arrive at the surface of the earth. Here are mineral mud baths, vapor, steam and other modes of water treatment.
The only diseases barred at Paso Robles are tuberculosis and nuclear miasmas.
Cases of chronic stomach trouble, alcoholism, nervous prostration, especially in women, worn out business men, rheumatism, gout, kidney and other troubles too numerous to mention, succumb to these waters as though they were but a slight indisposition. One may spend hours in the streets of the town listening to the convalescents tell of their former ill health and their cures. It sounds almost like a romance. Every luxury is here for the rich, while those who desire may bring a tent and camp out in the delightful meadows or along the river banks and be treated and cured at little expense. Boarding houses and private homes are also open to health seekers.
The air at Paso Robles is said to be the purest of any health resort in the world, and many claim as much for it as they do for the waters.
Truly it is interesting to know just what science will determine to be the solution of the question of Paso Robles' great cures and what its waters can really do.
A small book, neatly illustrated, has been recently published by the management, telling the story of the Hot Springs in a most interesting manner and giving complete information. Send for it, either Wm. McMurray, General Passenger Agent of the O. R. & N., Portland, Ore., or Dr. P. W. Sawyer, manager, Paso Robles, Cal.
