Have you noticed lately how the price of White Lead and Linseed Oil has been soaring? But two years ago a bushel of flax seed sold for \$1.15, while now it costs \$2.15 per bushel, so it is little wonder that the jobbing price of oil is around 95c now, when it was 45c two years ago. A circular letter from the big Eastern paint jobbers says that the average retail price of Sherwin-Williams Paint, excepting (note that exception) on the Pacific Coast is \$2.00 per gallon. Even at car load rates it costs 16 cents per gallon to land paint on the Coast. **BUT IN SPITE OF THIS EXCESSIVE FREIGHT COST WE ARE SELLING SHERWIN-WILLIAMS PAINT AT \$2.00 PER SINGLE GALLON (\$1.90 in 5-gallon cans) OR AT EXACTLY THE SAME PRICE AS IT IS SOLD FOR IN THE EAST.** This fact it seems to us is worth considering seriously by every consumer of paint. If you can buy Sherwin-Williams of us at the same price that it is sold for in the East where there is practically no freight, then you are surely getting your money's worth here where it costs from 16 to 20 cents per gallon for freight. Everyone knows so well the merits of Sherwin-Williams Paint that we need not go into that at this time. In comparing quality of paints no dealer says "better than S. & W.," but they often say, "just as good." If you think of painting this year send us your name on a postcard and we will have forwarded to you some information about painting that may be valuable to you and yet in no way put you under obligations to buy. We have a complete paint store where you can buy everything from a 5 cent brush and a 15 cent can of paint, up to a barrel of oil and a ton of lead. Equally important is the fact that our paint man knows his business—his advice can be relied upon and is worth money to you, unless you are a paint expert yourself.

ORCHARD AND GARDEN.

Promptly gather up and burn all brush and rubbish in the orchard. When spraying do not work with bare hands. They'll be sore if you do. Put on a pair of rubber gloves.

Remember when you plow in the orchard that the roots are very near the surface. Three inches is plenty deep enough.

Some fruit growers say that it is not a good plan to plow an orchard when the trees are in blossom,—better do it before or after.

How long will our orchards bear the neglect seen on every hand? We need less of extensive farming and more of intensive and sensible operations.

Now, don't wait till the last moment before ordering the berry plants. Give the folks who grow them a chance to fill the order in good shape without being hurried. Better for them and surely better for you.

When the leaves begin to grow, the canker-worm may commence to move up on the trunks of fruit and other trees. Bands of tar or printer's ink, if put on the tree trunks in time, will catch many of the pests.

An Original "Charlie-on-the-Spot."
Charles Halstead, of Milwaukee, was in Oregon City yesterday on business. Mr. Halstead is known by his friends as "Charlie-on-the-Spot," but he is not the one of Lala and Leander fame, but a plain, white-haired man of fifty.

In the person of Chas. Halstead, of Milwaukee, Promoter and Manager of the Herb Mfg. Co. of that town, by, as he calls it, "accidentally butting in," at the right time and right place he has been given the above name. Last winter he "budded in" to save a woman on the bullets of a revolver in the hands of a drunken husband, secured the gun before any harm was done, but had his skull laid bare for several inches by a club in the hands of the booze-crazed man, and had but barely recovered from the wound when he plunged into the icy waters of Lake Kellough and rescued the 6-year-old son of Councilman Stockton, of Milwaukee. By these acts of heroism the friends of "Charlie-on-the-Spot" think he is entitled to a Carnegie medal.
