Women's Secrets

There is one man in the United States who has perhaps heard

more women's secrets than any other man or woman in the country. These secrets are not secrets of guilt or shame, but the secrets of suffering, and they have been confided to Dr. R. V. Pierce in the hope and expectation of advice and help.

That lew of these women have been discontinuously.

That lew of these women have been disappointed in their expectations is proved by the fact that ninety-eight per cent. of all women treated by Dr. Pierce have been absolutely and altogether cured. Such a record would be remarkable if the

cases treated were numbered by hundreds only. But when that record applies to the treatment of more than half-a- mil-
