Cottage Grove is to be congratulated upon the nearing of the plans to take up actual construction of its water system to cost a hundred thousand dollars. THE GRANGE Conducted by J. W. BARKOW, Chairman, N. Y. Press Correspondent New York State Grange. COMBINING RURAL FORCES. Other Granges Can Do What Ypsilanti Is Doing Successfully. For the past three years Ypsilanti grange of Michigan, under the leadership of Lecturer Ennis H. Twist, has followed a policy of making one program in every quarter an open one and devoting it to the presentation by an outside speaker of some topic of general interest in the community. People outside the grange membership, but known to have direct interest in the particular subject to be considered, are invited. Sometimes other organizations which are working along this special line are asked to attend or send representatives to participate in the discussions. In this way questions relating to dairying, fruit culture, good roads, the state constitution, temperance, birds, schools and the tariff have been presented. Last November a model meeting took place when an all day session in conjunction with the Washington County Schoolteachers' association was held. Members of gleaner artists and of farmers' clubs, rural pastors and Sunday school workers, were cordially invited, for a part of the aim of the program was to consider how rural forces might strengthen one another's efforts. It proved to be a most valuable meeting. We can but name a few of the subjects discussed to show the range of topics: "School Sanitation," by a member of the state board of health; "The Rural Field and its Needs," by Lecturer Graham of the Pomona grange, who said that the field for uplift in country life comprised, first, better farming; second, better or more even distribution of farm products; third, doing away with the amassing of large fortunes; fourth, organization of farmers.

THE NEW JERSEY GRANGE. At the annual session of the New Jersey state grange the farmers were outspoken in their condemnation of the county tax boards, and they will memorialize the legislature on this subject. They are also of the opinion that boards of health over the farming products altogether in excess of the sanitary requirements. The milk espionage is especially obnoxious to the grangers, who believe there is an amount of red tape in the matter of inspection altogether out of gear with fair treatment. Among other matters discussed was the taxing of bank stock. It was agreed that bank stock should be taxed at its full value. The grange also favored a parcel post.

THE PENNSYLVANIA STATE GRANGE will meet at Butler, Pa., next December for its annual session. Since the last meeting of the state grange sixteen new subordinate granges have been organized.

One good jolly grange meeting will cure more blues than twenty doses of anybody's sarsaparilla.

VALUE OF GOOD ROADS. Increase Price of Farm Lands Fifty Dollars an Acre. Mecklenburg county, N. C., began to build macadam roads thirty years ago, using the direct taxation method of raising funds. Today that county has 208 miles of modern highways.

As a result of these good roads farm values have reached that point where \$50 an acre is regarded as the minimum price of such lands and \$75 and \$100 an acre the maximum. A few years ago \$50 was regarded as an exceedingly high price for an acre of Mecklenburg land. Now there are few—very few—farms in the county that can be purchased for less than \$50, and no great number are for sale at that price.

IDEAL RURAL SCHOOLS. What a Massachusetts Professor Thinks About Them. At the farmers' week meeting at Amherst, Mass., Professor Hart presented his views on the rural school, which were rather more advanced than those ordinarily held by educators so far as they have been publicly expressed. He remarked that the line of improvement for the rural school should
