Feed Wrong All Wrong NO DRILL BET-TER THAN IT'S

FEED NO FEED BET-TER THAN THE

HOOSIER POSITIVE FORCE FEED

Hoosier successes here in the Northwest have proven repeatedly that the Hoosier Grain Drill with the HOOSIER POSITIVE FORCE FEED is correct. This feed makes possible the feeding of seed in any desirable quantity, it seeds the ame on the side hill, up hill or down hill as on level ground, there is no fail to the Hoosier Drill. It does not seed in spots, but uniformly—continuously and accurately, this is not always true of gravity and other feeds. While handling the grain positively the feed does not scratch or mar it. This due to the advanced mechanical construction of this simple, reliable feed.

The entire construction of the Hoosier Drill is, as its feed, above the average, investigate carefully the median of this deal and compare them with those of any other and you will independ on the property of this deal and compare them with those of any other and you will independ on the carefully the

merits of this drill and compare them with those of any other and you will understand why we are safe from contradiction when we say that there is no drill on the market that will equal the Hoosier, either in work in the field or construction. Our circular, "The Feeding of the Seed," is interesting reading. We will send it with our Hoosier Catalogue to your address free. Drop us a line.

The Sanders Disc
