Potato digging and sowing has been the order of the day, but some few showings have come after the nice weather the farmers can have a rest again.

WHY NOT WOMAN'S SUFFRAGE? (An address given recently at the Y. M. C. A. hall in Portland by Clarence True Wilson, D. D.) When two armies face each other in battle the army of aggression, before it can engage the main body, must drive in the skirmish lines of the enemy. The woman's suffrage propaganda has thrown out certain skirmish lines in this public thought and these must be driven in before we can come to the main argument.

First, then, those who claim that the ballot is women's right quote from the declaration of independence that, "Taxation without representation is tyranny." But the quotation is not in point, for that sentiment was uttered with no possible reference to individual voters, male or female. It was a declaration of the representatives of the 13 colonies that unless these colonies could have a representative in the parliament and in the cabinet to protect their interests King George should not ask us to pay duty. It had no reference to the casting of ballots, for men voted in every colony, but it was a declaration that one government ought not to tax another without due representation.

Protection for Women. In order to make it refer to woman's suffrage it would have to be proven that women are not now properly represented by their husbands, fathers or brothers; that the government does not protect them in their property interests, and that they do not get value received for their money.

The question of voting has no reference to the paying of taxes. We pay our taxes in return for the protection to life and property, by the laws of a civilized nation. Some men who have no property vote and many who have no vote pay large taxes. Numerous young men and women, heirs to large estates, pay immense sums to the government, but have no vote. Corporations pay immense sums in taxes, but have no vote. Persons residing in foreign lands or who have lived in this country only a few years pay taxes, but have no vote. In fact voting has no reference whatever to taxes.—Oregon State Association Opposed to the Extension of the Suffrage to Women. Mrs. Francis J. Bailey, President. Paid Advt.
