MOLALLA.

Fifty years ago the Molalla Tribe of Indians would have applied the "paint" and been on the war path, and a pale face mother's son would have been delivered to the red skins for torture. In order to have avoided further trouble with the whites, the old "Cong Chief" would have been H-I-h-a-h-a in seeing the flesh fry from the roibers of his people's graves; many years ago Maxwell Ramsby, one of the old pioneers of Molalla, gave Beaver Trapper Chief the permission to bury his dead Indians on the Ramsby claim in sound of the roaring Molalla river, for which privilege Beaver Trapper was ever grateful, saying that Mr. Ramsby had a hi-tum-tan and was the only white brother he had left, when the night of the previous day, when H. S. Ramsby and the boys were all absent from home. The supposed object for the pliffing of these Indian graves is to obtain elk teeth—that were supplied by the relative of the departed spirits to decorate them for the "holy hunting grounds" day, when the order of Elk at a handsome figure (\$10 apiece). These Indian grave sneaks may think their stars that old Chief Metzga is not on their tracks or they would soon be broiling at the spot.

Patriotism

The stomach is a larger factor in "life, liberty and the pursuit of happiness" than most people are aware. Patriotism can withstand hunger but not dyspepsia. The confirmed dyspeptic "is fit for treason, stratagems and spoils." The man who goes to the front for his country with a weak stomach will be a weak soldier and a fault finder. A sound stomach makes for good citizenship as well as for health and happiness. Diseases of the stomach and other organs of digestion and nutrition are promptly and permanently cured by the use of **Dr. PIERCE'S GOLDEN MEDICAL DISCOVERY.** It builds up the body with sound flesh and solid muscle. The dealer who offers a substitute for the "Discovery" is only seeking to make the little more profit realized on the sale of less meritorious preparations. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the paper covered book, or 31 stamps for the cloth bound. STAFFORD.
The sad news comes of the death this morning of Henry Eliassen. His death was unexpected, as he had been upon his father's farm, where he was engaged in the usual work of a farmer, and he was taken away to almost a sudden death. He was the eldest son of Fred Eliassen and Mary, his wife, was about 29 years old, and his whole life has been spent upon his father's farm, where his self-forgetting merry disposition will ever be treasured in the hearts of those who are left to mourn his early death. Besides his mother and father he leaves three sisters and one brother and hosts of other relatives, and the life long friends and neighbors of his childhood's boyhood and young manhood to mourn the death of one of whom no one ever had ought but good words to speak. His mother has been doubly beloved recently, as she followed a dearly beloved mother (Mrs. Turner) to the grave less than three weeks ago.

There is a much sickness in and near this neighborhood as elsewhere, principally colds and la grippe. No fatal cases from these causes have resulted as yet, but there is scarcely a house where there is not from one to four sick, but at present writing all are better and are many new cases. Among the latter we regret to say is Mrs. Powell, who is threatened with pneumonia, but we are happy to hear she seems to be resting easier at present.

Mrs. Aorni has one of her daughters visiting her with her baby boy. Miss Helen Rabie is slowly getting better, and as from present indications we are promised a spell of fine weather, we are all hopeful it will be of benefit to the ailing.

Seems to your correspondent that, like all good things, the worthy Mr. Finley, of the Audubon society is disappearing, being clothed with a little brief ground. Of course Chas. pheasants are not as plentiful now as formerly, but if I have a lady friend who obtained one of their skins a number of years ago, and liking the beautiful thing so well she has it made over every winter, or used for trimming, should any one in this free land have the power to deprive her of it, or in any way make trouble for her, I do not see the justice.

A woman doctor who belonged to the society was lecturing upon birds, and pleaded for the beautiful little bonnet, which did her harm, but a boy dissected it and counted 84 little cherries he had picked, and when an army of them came for breakfast and supper, it leaves but a small portion to the owner of the tree. Now, I believe in the work of the Audubon society, as I understand it was first started, but thought no harm, but it need be able to distinguish between a pest and a blessing when they attempt to teach farmers.

Ment Peters, who has been sick a long time, ending in dropsy, died on Tuesday night.
