The Feed Is the Heart of the Drill==
Some Drills Have Heart Disease==
But Not the Hoosier.

Its heart is perfectly sound. Its feed is a positive force feed, which seeds uniformly and accurately, regardless of conditions. It works as well on the side hill, up hill or down hill as on the level. There is no guess work, you set the feed regulator at the quantity you want to sow and you know that you are seeding just that amount, no more or no less. That's why you want to be sure your drill is Positive Force Feed Machine and the only way to be absolutely sure is to buy a Hoosier. Write for our circular "The Feeding of Seed".
