HOME FROM CALIFORNIA.

Oak Grove People Have Pleasant Time, But Glad to Get Home.

Mr. and Mrs. C. L. Vonderhabe have returned to their home at Oak Grove from their trip to California, where they spent five weeks sightseeing.

The weather was delightful in many of the places they visited, but they state the water was poor, and did not compare with that found in Oregon.

They are glad to get back to their home in Oregon, where they can enjoy the air and an occasional rain-storm. Mr. Vonderhabe says that in all of his travels in California he never saw any prettier girls, with the rosy complexions found in Oregon, and especially in Portland. They visited Oregon City Thursday afternoon, returning to their home last night.

MILWAUKIE TO IMPROVE.

Main Street Will Now Be Paved With Crushed Macadam.

Contractors will be invited to bid on much street improvement work in Milwaukee this year. Time and manner ordinance has passed for the paving of Main street through the center of the town, and the legal notices have been posted. A crushed macadam is called for on this street.

It has not been settled whether the city will furnish the rock or buy it. The town has authority to purchase a rock crusher and crush rock for its streets, but will not do so if bids received are considered reasonable.

Several other streets are to be improved with crushed rock, and proceedings will be started at once. All improvements aggregating \$20,000 will be undertaken this year. The city is now working under the new charter adopted at the recent special election, and under the charter property owners can bond their property for street improvements. Macadam is to be laid for the present and Westrumite pavement will be laid later.

BOURNE'S WINGS CLIPPED.

While W. H. Taft is President no patronage will be distributed by United States Senator Bourne.

There now exists a gap between the President and the Senator which cannot be bridged. That speech of Bourne's on the President and patronage, in which he practically charged Taft with using patronage as bribes and intimidation, completely severed Bourne from the pie counter—he wasn't very close to it even before.

JAPAN'S MOVE WILL CURTAIL SHIPMENTS FROM COAST.

Beginning July 1, the Japanese government will impose a duty of 77 cents on every 100 pounds of wheat shipped into that country. The present duty is 57 cents on 100 pounds of the cereal. The increase of 20 cents in tariff, it is predicted, in shipping circles, will curtail the exports of the foodstuffs from this coast to the island Empire. A corresponding duty will be imposed on flour on the same date.

THREE UNHAPPY WIVES ASK LEGAL FREEDOM

EACH HAS A DIFFERENT STORY TO TELL, AND THE COURT MUST HEAR AND DECIDE.

Three suits for divorce have been filed in the Circuit Court. Pauline Pankopf, who was married at St. Paul, Minn., September 19, 1894, to Albert E. Pankopf, charges him with desertion January 1, 1910. They have one son, Otto, aged 15 years.

Anna Thompson has filed suit for divorce against James Thompson, to whom she was married at Portland, January 8, 1907. She says he called her vile names, and though he has a good occupation, he refused to support her. He is charged with desertion.

Mary L. Day and J. S. Day were married October 12, 1909, at Portland. She is 73 years of age, and says his vulgar remarks caused her to lose respect and affection for him. He sued her son, A. J. Brown, for damages, claiming alienation of her affections, but Mrs. Day says his charge is not true, but that she left him because he would not support her. She asks for \$25 a month alimony and for permission to resume her maiden name of Brown.

STONE OIL WELL IS MAKING GOOD SHOW

CASING DOWN BELOW 850 FOOT MARK.

STONE, Or., March 14.—(Spl.)—News from this neck of the woods is interesting these days, and all on account of the progress that is being made with our oil well here. The new men who are operating the well are from the California oil field and naturally understand conditions in the West. They seem to be pushers and up to snuff in the oil and oil well business. They have installed new machinery and now things are running smoothly and with great speed.

Tuesday, for the past 24 hours, a depth was drilled in of 50 feet—and the prospects were good at the change to the night trick for a continued spell of rapid progress. At that time the casing was down the full 850 feet which was the lowest depth reached in the history of the well. That means that all the debris shaken loose ago has been fished out and that the drill is in new soil.

The new soil is shale and the drillers report that it is a similar shale to that in which oil is found in California. As the conditions are similar here to those in California, and as similar prospects are looked for, naturally those working about the well feel encouraged by the indications that the drill brings up from day to day.

THIRTY-FIVE FEET IS MONDAY'S RECORD

VERY FAST SINCE SECOND TRICK IS PUT ON.

At this time the drill is bringing up good clean sand and the drill is practically down to where the hard rock is reached—850 feet—and the debris that filled the well after the dynamite charge was set off is practically removed from the well. Everything is going smoothly and the prospects are the most rose of any time in the history of the well.

While the drill is practically about the same point it was before the well was shot some time ago still there is more pipe in the well at this time than at any previous time in the history of the well. This is an indication that it is a trifle below an previous depth record before published. Now that the drillers have the well in hand so that they are making a descent of 35 feet a day the public may expect almost any time to hear real oil news.

The drillers feel satisfied that they have the casing down far enough so that it shuts off the flow of water, and that the water will not bother them again. In an oil or gas well water is the one thing that destroys the effort to get results so that is one of the first things that must be eliminated. This the drillers feel certain, they have been able to accomplish at the Stone well.

The drill is in the shale which is a loose formation and permits the drill to go down with good speed. It is now down beyond the 850 foot mark and will be pushed on until a depth of 1200 feet is reached; when, if no oil or gas is in sight, a conference will be held and further plans made. It is hoped to get a good flow before that time, however, and work is going forward with that expectation in mind.

DOUBLE TURN WORK CAUSES DISCUSSIONS AMONG NEIGHBORS AS TO SUCCESS COURTED.

The Home Oil and Gas Company, the company that is so gaily putting down the oil well at Stone, regardless of difficulties and interruptions, received a lot of new machinery via the O. W. P. Friday. It was a shipment from the Star Drilling Co., of Portland, and is for use in exploring the bowels of Old Mother Earth, out at Stone, with the hope of finding something that will prove profitable.

The people of Stone are all agape over the double turn operations of the company. In the past the citizens have been willing that the night might do the deeds of the night and none other and now here comes a gang of men determined to turn night into day and the denizens of that little burg hardly know what to make of it. Nevertheless the people are all glad to see the drill sinking slowly but surely downward without any intermission.

DRILLING NIGHT AND DAY.

Prospects for Oil Are Brighter With Each Returning Sun. STONE, Or., March 14.—(Spl.)—Still the oil well goes down, down, down. It isn't going very fast, for when you get 900 or 1000 feet under ground you don't find things as soft as old cheese; but it's going down slowly and the two tricks keep the hole warm the whole 24 hours.

The piece of tubing still in the well is giving no trouble just now; belief is that it won't give any more. The drill has been sent on down past it and it looks as if the well was to be a success. New machinery is being installed and the men in charge of the work now act more like old seasoned drillers than any before.
