The county is replacing the old worn out culverts with new ones made of stone. This is a practical plan and everybody approves the idea so far as heard. John Hatton and Wm. Mumpower are getting out the covering for those culverts at Bakers Bridge. Try it. This stone is especially suitable because it is strong and hard and splits well one way. Some day we hope to see a rock crusher out here for we have the best rock in the county for the purpose and John Hatton has rock enough to cover all the roads in the county and still some for adjoining counties.

Arthur Cliff expects to commence on his bungalow again as soon as all danger of frost is over. Cliff is, at present, shearing geese for A. R. Smith, who have been told that D. T. Whiteman may be given another mail route instead of No. 2. We will be sorry to lose him, because he has been an obliging and painstaking carrier, but if he is to profit by the change we wish him good luck.

The oil well still goes down apace and all have hopes that oil will be found in abundance.

Just think of it, if oil is found in abundance, the Ogie mine proving to be good, and a new railroad to Molalla—what is the matter with old Clackamas?

"I have been using it for some time," she wrote, "and the awful cough has almost gone. It also saved my little boy when taken with a severe bronchial trouble." Some of our Grangers attended the Clackamas County Pomona Grange at Parkplace, where all were royally entertained and a general good time indulged in. Mrs. Clara Waldo entertained the members with a most interesting talk on her trip in foreign lands. The Grange was asked to endorse the Canadian Reciprocity treaty but after some discussion was voted down, inasmuch as it was not a square deal for the farmer. ## The Feed Is the Heart of the Drill==

Some Drills Have Heart Disease==  
But Not the Hoosier.

Its heart is perfectly sound. Its feed is a positive force feed, which seeds uniformly and accurately, regardless of conditions. It works as well on the side hill, up hill or down hill as on the level. There is no guess work, you set the feed regulator at the quantity you want to sow and you know that you are seeding just that amount, no more or no less. That's why you want to be sure your drill is Positive Force Feed Machine and the only way to be absolutely sure is to buy a Hoosier. Write for our circular "The Feeding of Seed".

### STAFFORD.

We are having April weather these April days. Still late seeding and early gardening goes steadily on.

Jake Schattz must be preparing to join the Mexican rebels, as he has used up 1 1/2 ton of explosives on the hill north of the vineyard, and calls for about another half ton. He has made Stafford rock when explosion after explosion sent the roots flying skyward.

Mr. Nussbaum has got his patch all plowed ready for a crop.

There has been some call for work horses, which are high in price this year.

Mr. Moser has concluded to remain in his old neighborhood, near his children, and is about to build a house for himself near his sons.

Mr. Frenzel, one of our progressive newly-weds, has quite an acreage already plowed on his new place. He has kept busy steadily going for a long time, and he and his young wife seem to be progressive workers.

Mr. and Mrs. Holton and young daughters came out to her father's, Mr. Gage, on Saturday, their 15th anniversary, and spent Easter in the manner Easter is usually spent.

Mr. Holton was to go to San Francisco on Tuesday on a business trip, as he has some property down there which he thinks of disposing of, and investing in Portland.

Mrs. Powell's front door blew shut and broke the etched glass, and Jake Schattz is to replace it; also the one in the store door, broken by burglars some time ago.

Mrs. Martha Schewe-Hamilton, with her month-old baby girl, came to visit her mother, Mrs. P. A. Baker, Man-wal, the son who returned from Portland, to visit his mother, and the mother and children went to Oregon City and had a family group taken.

Mr. Weisman has been helping Mr. Baker clear some land.

A man of 62 came along looking for work. Mr. Gage kept him a couple of weeks, when the spirit of the "Wandering Willie" took hold of him again, and Mr. Gage paid him off, and he started on his travels again, seeking pastures new. So many such decrepits are floating about in this country, at home wherever they take off their hat and nothing but the poor house or some charitable home to look forward to when age and helplessness comes creeping on. Take the thought to heart boys, if you don't save a few pennies while youth and young manhood are yours, you will not have the dollars when you get old to make you comfortable and independent.

## POTATO CURIOSITY WITH PURPLE MEAT

HENRY HEITKEMPER PROPAGATES THEM FROM SEED DIRECT FROM GERMANY.

Henry Heitkemper, of Courtney, has a vegetable curiosity in the form of a purple meated potato, which he has raised successfully on his place, south of Milwaukie. Mr. Heitkemper is the father of Mrs. Frank Busch, of Oregon City.

He obtained some seed from Germany and planted the potato in the sandy loam on his place, and secured an excellent crop as a result. In Germany the vegetable is known as the "Sunday" potato, being better in flavor and more mealy than the ordinary white potato. The skin is nearly black, while the inside is a beautiful deep purple. The potato does not grow in hills, nor in clusters, but strings out on a root like a vine, under ground.

Mr. Heitkemper believes that growers in the Willamette Valley will have no trouble in obtaining results and he is very willing to give a few potatoes for seed to any person calling on Mr. Busch at Oregon City or Mr. Heitkemper himself at Courtney.

## MINIMUM OF RAINFUL IN MONTH OF MARCH

PRESENT YEAR IS THE BANNER YEAR FOR DAYS WITHOUT RAIN.

CORVALLIS, Or., April 17.—The month just past is one of the most remarkable on record during the last twenty years for the minimum amount of rainfall and the number of warm, clear, spring-like days and general fair weather," says W. L. Powers, of the Oregon Agricultural College agronomy department, who is weather observer at the college. He gives the following interesting data for the past month.

"The precipitation, which was .75 inches, is the lowest amount on record for the last fifteen years and without doubt the lowest for the past twenty years. The nearest approach to this was last year, when the rainfall for March was 1
