LOGAN.

The better the weather, the busier the people are, at least in Logan.

The Logan Booster Ball Saturday night was well patronized; a large crowd in attendance.

The Clackamas Grange will play "Brookdale Farm" at Harding Grange hall, Logan, on Friday evening, April 28. Come all and have a good time.

Fred Gerber and N. N. Robbins are attending the Clark and Richmond trial in Portland.

On Saturday, May 6, the Single Tax question will be discussed at Harding Grange in afternoon at 1:30 o'clock. Brother U'Ren may fool part of the people part of the time, some of them all the time but not all of them all of the time. If agriculture is the basic industry of the country and of the world, it is entitled to recognition in legislative affairs. History proves that in all countries where agriculture has prospered all other industries have declined and where agriculture has declined all other industries have prospered. Agriculture does not depend upon other industries for prosperity but other industries depend upon agriculture as the basis of their prosperity. The forty million people living on the farms of the country are entitled to as great recognition in tariff and other legislation as an equal number engaged in non-productive industries." The above is from the annual address of the Master of the National Grange. Full well does U'Ren know if the people knew and understood his Henry George tax theory it would not stand a ghost of a chance. It is known it would stagnate all agricultural development. Who has a right to the land the farmer has spent his life on with the concentrated efforts of himself, wife and family to make a home of, that is a credit to them and the community they live in, if not himself and family. Yet, according to some we ought to pay all the taxes and those in business in cities, who have all the social and educational privileges and advantages over us, let them off easy. The mistake idea seem to prevail that farmers are money makers. "Is true they are sure of a living if willing to work 16 hours per day to get it. You can't live without the "hustle" anywhere.

We continue to have light frosts, hardly enough to seriously injure crops, so say the farmers. Gardens need warm rain and sunshine.

STAFFORD.

Some of the citizens of this place went down Saturday and helped boost Oregon City. All the exhibits were fine, and especially the horses. There was but a comparatively short notice and for the time Clackamas had to prepare, she did as she always does, and the few moments we watched the daring sky-scraper come down so suddenly from his burning balloon. It proved to be rather an expensive free show to the power station, into whose wires Wilson fell, but all were thankful to see him escape unhurt.

The Feed Is the Heart of the Drill--

Some Drills Have Heart Disease--

But Not the Hoosier.

Its heart is perfectly sound. Its feed is a positive force feed, which seeds uniformly and accurately, regardless of conditions. It works as well on the side hill, up hill or down hill as on the level. There is no guess work, you set the feed regulator at the quantity you want to sow and you know that you are seeding just that amount, no more or no less. That's why you want to be sure your drill is Positive Force Feed Machine and the only way to be absolutely sure is to buy a Hoosier. Write for our circular "The Feeding of Seed".

Do Ghosts Haunt Swamps?

No, never. It's foolish to fear a fancied evil, when there are real and deadly perils to guard against in swamps and marshes, bayous, and lowlands. These are the malaria germs that cause ague, chills and fever, weakness, aches in the bones and muscles and may induce deadly typhoid. But Electric Bitters destroys and casts out these vicious germs from the blood. "Three bottles drove all the malaria from my system," wrote Wm. Fretwell, of Lucama, N. C., "and I've had fine health ever since." Use this safe, sure remedy only. 50c at Jones Drug Co.
