These Three Advantages Alone Make the CHAMPION MOWER Superior to All Other Machines

KNIFE HEAD--The Champion Knife Head has a broad bearing surface. Parts are of case hardened steel to prevent wear. The knife head is long and very strong. Wear caused by the revolving pitman is automatically taken up by means of an adjusting device.

COUPLING YOKE--The coupling yoke is wide and very substantial, making it impossible for the knife to get out of line with the pitman.

COUPLING PINS--The coupling pins are large and case hardened. They provide excellent bearing surfaces. The wide yoke, long pins and the substantial way in which the shoe is attached to the yoke insures positive alignment of the knife and pitman.

With These Superior Features are Combined Many Others--Strength of Construction--Ease of Operation--Light Draft.
