EXPERT SAYS OIL IS NEAR IN STONE WELL

LARGE AMOUNT OF WATER MAKES IT NECESSARY TO PUT IN CASING.

An expert of twenty-five years' experience, who has examined the recent formations encountered in the drilling of the oil well near Stone, said Tuesday that a large flow of oil from the well is probable at any time. He said that the formations were similar to those encountered in other wells just before oil was found in paying quantities. There being more than 800 feet of water in the well it has been found necessary to put in about 1,400 feet of casing. This work will be done at once, and drilling will be discontinued only a few days. The promoters of the enterprise are much encouraged over the report of the expert and it is confidently believed that oil and gas, both in large quantities, will be found as soon as the casing is installed and the drilling resumed.

SALT LAKE CITY, June 27.—Salt Lake City, Oregon and Park City went "wet" at today's local option elections by heavy majorities. Urovo and Logan are dry. The agricultural communities are generally for prohibition and the mining towns retains the saloons. School Has Good Balance. ELGIN, Or., June 27.—At the annual school election for Elgin District No. 23 R. C. Patten was elected to succeed H. H. Hug as director, and George F. Smith was chosen clerk to succeed U. F. Weiss. The report turned over by Clerk Weiss shows a balance in the treasury of nearly \$2,000.
