**MR. SUTHERLAND ENTERTAINS.** Once in a while some congressman breaks loose in Washington in an attack on the particular form of government that has become to be designated as the "Oregon System." This time it is Senator Sutherland, of Utah, who the other day, took the time of the Senate to declare that the proposed constitution of Utah should not be ratified for the sole reason that its provisions embraced the initiative, the referendum, the recall and other Oregon measures.

We do not know whether Mr. Sutherland accurately represents the sentiments of the majority of the people of his state, but we venture he does not. No doubt he feels that with the kind of a constitution proposed, his chances for return to the United States Senate are considerably lessened.

While we, in Oregon, cannot indorse Mr. Sutherland's views, which are certainly not based upon a close acquaintance with the results of the Oregon System, we cannot refrain from quoting some of his highly entertaining remarks, which follow: Within the last few years the United States of America has become the field of operation for an amiable band of insurgent soothsayers, who have been going up and down the land indulging in cabalistic utterances respecting the initiative, referendum and recall, and divers and sundry other ingenious devices for realizing the millennium by the ready and simple method of voting it out of its present state of incubation. They direct our attention to the clouds flying above the far Western horizon, upon which the flaming finger of the Oregon sun has traced, in radiant and opalescent tints, glowing pathways, shining minarets, stately temples, and castles and palaces, pinnacles of gold and caves of purple, and they tell us that these are the visible signs which mark the exact location of the new and improved political Jerusalem. Here, they bewitched officeholders cease from troubling and the weary voters do all the work.

The voice of the professional reformer is heard in the land insistently calling upon us to forsake the ancient and well-beaten paths along which we have proceeded, at least in security, for a century and a quarter and get heading in new and unexplored directions, luckily to find ourselves in pleasant fields and firm footing or unluckily plunged over the precipice or engulfed in the dismal swamp. The distinguished Senator from Oregon (Mr. Bourne) is perhaps the present living exponent of this doctrine. His recent, roughly stated, 1 understand to be this: Take the voices of 10 foolish men, 20 ordinary men, 5 rascals, 16 good citizens and 3 wise men (if any such can be induced to join); mix them all up together, with the result, vox populi, vox Dei.

**Ugh.** A correspondent of an English paper points out one way of pronouncing the letters "ough." These are, written phonetically, as in red, cut, such is allowable, ough, thud, the, thro, hup, the Irish ough and the Scot's pronunciation of ough, "ooh," the usual consonants in the last few words representing the corresponding guttural as in German. The editor in comment adds, "There is one other 'ough'—"
