Woman's Power Over Man Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves on, no one in the wide world can know the best agony she endures. The woman who suffers from weakness and derangement of her special womanly organism soon loses the power to sway the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her amiability and her power and prestige as a woman. Dr. R. V. Pierce, of Buffalo, N.Y., with the assistance of his state of able physicians, has prescribed a remedy for women's ailments. It is known as Dr. Pierce's Favorite Prescription. It is a positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates, strengthens and heals. Medicine dealers sell it. No honest dealer will advise you to accept a substitute in order to make a little larger profit. IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL. Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels. STOLEN TEAM FOUND NEAR OWNER'S HOME E. R. Baker of the Grand Union Tea Company, on Seventh street near Center, has recovered the two horses stolen from his barn on the West Side Saturday night. He started back to this city to notify Sheriff Mass, and on his way here met one of his neighbors, Fred Buse. Mr. Buse proceeded to his home, and on his way met two men on horseback. He asked the men whose horses they were riding. They said nothing, but dismounted and disappeared in the woods. The horses had never been ridden before and the men had a hard time trying to 'break' them in. The horses were found grazing Sunday near Mr. Buse's home. NEW HIGH SCHOOL CREDIT TO CITY LARGE INCREASE IN ATTENDANCE DANCE EXPECTED AS RESULT OF BUILDING. BEST EQUIPMENT TO BE INSTALLED Ceremony Being Planned For Dedication of Structure—Manual Training Department To Be New Feature. When the fall term of the Oregon City public schools opens September 18, the students and teachers will witness a wonderful transformation in buildings, equipment and apparatus. The most notable advance in school construction in many years has been the erection during the last year of the new high school at Oregon City. This structure is now practically complete and will be ready for occupancy next month, and it is expected that the attendance in the local high school will be materially increased as a result of the progressive policy of the board of education. Committees have been at work for several weeks in purchasing equipment and apparatus for the building, and the board intends to have the furnishings thoroughly modern and in harmony with the structure itself. The school directors Thursday night entered into contract with F. A. Piper to furnish the curtains for the auditorium stage. Mr. Piper is a painter and decorator who recently came to Oregon City, and his curtain scenes will be typical of Oregon scenery and will be selected and approved by the directors. The Oregon City high school has 12 rooms. There are class rooms on every floor, and the manual training and domestic science departments in the basement and the physical and chemical laboratories on the upper floor will be fitted up with the latest appliances. The library is on the first floor, as is also the main auditorium, which has a gallery with an entrance from the second floor. The seating capacity of the auditorium is nearly 400. The installation of a system of program clocks was referred to a committee at Thursday night's meeting, and authority was given to a committee to proceed with the construction of a retaining wall on the Twelfth street side of the block on which the high school building is situated. This wall will come to the property line, but will not overlap on the parking strip, this privilege having been denied the school district by the City Council. It is possible that suitable ceremony will mark the dedication of the new building within a few weeks. Within are reproductions of the log house in which Astor's expedition wintered in 1811-12, the "barn" in which the "peltries" were stored, the machine shop, the ammunition magazine, and the storehouse. The stockade is made of six-inch logs, ten feet high and sharpened at the top, with block houses at each of the four corners. Three Couples Granted Licenses. BRIDGE WEAKENED BY TRACTION ENGINE

County Judge Beattie and J. B. Mitts, road supervisor, Thursday inspected the covered bridge across the Molalla river near Canby, which was weakened Tuesday by a traction engine passing over it. Instructions were issued stopping all heavy traffic over the structure until it can be repaired. The cost will be in the neighborhood of \$250. The man in charge of the engine felt the bridge giving as he passed over it, and Charles Hartig, owner of the engine, notified the County Court of the fact. An inspection revealed that several of the joists had been cracked. The bridge was built about twenty-five years ago, but the timbers show no signs of decay. The work of repairing the structure will be started as soon as possible.
