

### When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

**Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures female weakness.**

Sick women are invited to consult Dr. Pierce by letter, free. All correspondence strictly private and sacredly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

If you want a book that tells all about women's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers, in handsome cloth-binding, 31 stamps.

## TAFT WILLING TO GIVE ALASKA AID CLUB TO GIVE BIG SMOKER WEDNESDAY

SEMI-SELF-GOVERNING BODY FOR TERRITORY IS FAVORED BY PRESIDENT.

LEASE PLAN IS HIS SUGGESTION

Great Crowd Greet Nation's Executive in Seattle—Part-Elective Administration, He Says, Is North's Need.

## PORTLAND GIVES TAFT GREETING

NATION'S CHIEF ACCORDED BIG OVATION IN METROPOLIS OF STATE.

EIGHT HOURS 'DELIGHTFULLY' SPENT

ComMerical Club Banquet One Of Features Of Visit—Thousands See President in Street Tour.

PORTLAND, Oct. 11.—(Special.)—William Howard Taft, President of the United States, passed eight hours as Portland's guest of honor today. Not at any point on his present tour of the country has the President been received with more open-hearted hospitality or greater show of enthusiasm and affection by the people.

Arriving in the city in the waning hour of a perfect October day the President found tens of thousands of Portland men, women and children assembled about the station grounds and along the principal streets to join in the demonstration of welcome.

More than five hours of the President's stay in Portland was consumed by the various parts of the program arranged for him. But while it was arduous, the program was carried out with never a hitch. Provision was made for the famous Taft forty winks of sleep which are said to be all the big man needs to lay up a full new store of reserve energy. He had this nap of twenty minutes at the Commercial Club just before the big banquet given in his honor and emerged from the brief rest quite as fresh as if he had not been making car-pooling speeches all day in addition to directing the destinies of the Nation from the "White House on wheels" in which he is visiting twenty-four states.

An informal reception at the Union Station, an automobile procession through the principal streets, a banquet and address at the Commercial Club, an hour's public address at the Armory and a visit to the Knights of Columbus—that summarizes the President's activities while in Portland. All official business had been disposed of on the train en route here from Puget Sound so that his time, previous to retiring shortly before 11 p. m. in his private car, was given wholly to the program of events that had been arranged.

The two distinct features of his visit were the public meeting at the Armory and the banquet at the Commercial Club. In his Armory address President Taft took up subjects of the greatest national importance as well as subjects especially pertinent to Oregon and the Coast country.

In the outfield of the New York gardeners here on the Mackintosh as far as speed is concerned, but otherwise the difference is slight. Summing up the whole situation, if Mathewson and Marquard show championship form and can be worked nearly every day, the chances of New York are good. If not, then they are up against a hard proposition. At least two of the first string of four of Mack's men are sure to come up to expectations, while the other two will help if given a chance to work.

While Eddie Collins is one of the best basemen in the American League, his work on the paths cannot be compared to the Giants, who have six of the seven leading candidates for the honors in the National circuit. One must wait the pail to get on the paths, and it may be argued that the Giants will be up against this very proposition, but time alone can tell.

## ATHLETICS HAVE SHADE ON GIANTS

COMPARISON OF BIG LEAGUE CHAMPIONS SHOW TEAMS ARE WELL-MATCHED.

PHILADELPHIANS ARE CONFIDENT

McGraw Expects His Team To Win By Fast Base-running And Fine Work in Box—Lapp Best Catcher.

Who will win and how they will win in the World's Series is occupying the minds of all the sport writers of the country as well as every citizen who knows a hat from a piece of kindling. Most of the wise ones are picking the Athletics, not only on account of their heavier hitting ability, but also because of their having been under fire in the last campaign, while but few of the Giants remain who conquered the players under Connie Mack's guidance in 1905. Confidence is a great asset, and what the Athletics did to the Cubs last year they are confident of repeating on the New Yorkers.

Each club has shown superiority to all its rivals, and each is handled by one of the greatest pilots in the game today.

That it will be a battle of wits to a large extent is acknowledged by all, and whether Mack's men can repeat is the burning question of the hour.

Last year the Cubs put up a woefully weak battle, due principally to the poor condition of its pitching staff, and the team that was the greatest class to stem the tide. King Cole, then a recruit, was the only Cub heavier who was really fit to fool the Athletics to any degree.

Mathewson in Fine Form. With the Giants it is different. Two of the leading pitchers of the league are embraced in Mathewson and Marquard, while Crandall, Ames and Wittie are all able to prove formidable. Mathewson is in better shape right now than at any time this season, and should show almost as good form as he did last year against the New York Highlanders in the post-season series for the championship of the city.

But in comparison the big four of the Athletics, each a veteran of tried ability—Coombs, Bender, Plank and Lapp—form the greatest and best balanced pitching corps in the country. While Bender and Coombs were relied on in the series last year, Mack has Plank and Morgan, each of whom is in the best of shape.

Neither catching staff has a Gibson or a Iresnan in its makeup, the best receiver of the bunch being Jack Lapp of the Athletics. Jack is a natural 300 hitter, a good peger, and strong in every department. Myers of the Giants, is a wonderful hitter also, but is weak on catching thrown balls at the plate which may count a great deal with runners of the type of Eddie Collins.

The infield of the Athletics has a shade, taking the man for man, McGraw has added Fletcher and Herzog to the left side of the diamond this season and both are making good, but are not the stars as yet that Baker and Barry have proved themselves to be.

Davis may lack the speed of Merkle at first, but makes up for it by his experience received in years of hard campaigning. Both Collins and Doyle are wonderful guardians of the middle sack, but again Collins has more than a shade when it comes to all around ability. The infield of the Athletics is more reliable and has better fielders, who are also heavier hitters.

Outfield Best. In the outfield of the New York gardeners here on the Mackintosh as far as speed is concerned, but otherwise the difference is slight. Summing up the whole situation, if Mathewson and Marquard show championship form and can be worked nearly every day, the chances of New York are good. If not, then they are up against a hard proposition. At least two of the first string of four of Mack's men are sure to come up to expectations, while the other two will help if given a chance to work.

While Eddie Collins is one of the best basemen in the American League, his work on the paths cannot be compared to the Giants, who have six of the seven leading candidates for the honors in the National circuit. ## DOMESTIC SCIENCE MRS. TAYLOR ASKS APPEALS TO MANY \$2,500 MONTHLY

MISS PORTER, TEACHER, IS URGED TO HAVE CLASS ON SATURDAYS.

DIRECTORS NOT OPPOSED TO PLAN \$7,000 IS WANTED FOR EXPENSES

Gas Will Be Turned In Ovens Today And School Children Will Begin Cooking—Many Bills Are Considered.

The proposal to allow others than the students of the Oregon City schools to take advantage of the facilities offered at the high school building for work in domestic science was received kindly Monday night at a meeting of the board of directors. Miss Lulu Porter, an expert in domestic science, has been besieged with applications for classes on Saturdays from women and girls not attending school, and Miss Porter is inclined to give up some of her time on Saturdays so enthusiastic is she over the opportunity of imparting her knowledge of scientific handling of household problems.

Acetylene gas will be turned into the ovens today, and the students will have a chance to sample the prize packages of the budding cooks who are so eager to learn the culinary art. Miss Porter believes she can form two Saturday classes of eighteen persons each and it is very probable that the board will permit this innovation just as soon as the work of the city schools has settled down to its normal condition.

Bills incident to the construction of the new school building occupied the directors' attention until past 1 o'clock Monday night, and considerable time was spent in consultation with Architect Aaron H. Gould, and Superintendent of Construction C. W. Yonderberg. The board plans to have the Barclay gymnasium arranged for a play-room and a lunch-room. The big "gym" may be partitioned for this purpose.

The enrollment of the city schools exceeds that of last year by nearly 100, the total now being \$41, divided as follows: High school, 177; Barclay, 305; Eastham, 359.

Officer Jack Frost was appointed truant officer to serve during the school year. He will act under the direction of the school law and the city superintendent and is expected to keep a vigilant eye upon the parents who ignore the law requiring compulsory attendance of children in school.

WAR DECLARED.

Catarth Germs Must Be Conquered or Health Will Be Destroyed.

If you have catarth you must vanquish an army of persistent, destructive microbes before you can get rid of it.

You might as well choose your weapons, declare war and annihilate this army of catarth germs right now. Stomach dosing won't kill them; neither will sprays or douches.

HYOMEI, a pleasant, antiseptic, germ destroying air breathed over the entire membrane will put catarth germs out of business in short order.

HYOMEI (pronounce it High-mei) is guaranteed by Huntley Bros. Co. to end catarth, asthma, bronchitis, coughs, colds and croup, or money back. If you own a little HYOMEI hard rubber pocket inhaler you can get separate bottles of HYOMEI for only 50 cents. If you haven't an inhaler buy a complete outfit that only costs \$1.00.

WILLIAMS FAVORS WOODROW WILSON

MERIDIAN, Miss., Oct. 11.—(Special.)—That he will support Woodrow Wilson, governor of New Jersey, for the Democratic nomination for President of the United States, is the statement made here today by Senator John Sharp Williams of Mississippi, one of the most prominent figures in national Democratic politics.

"After giving the subject careful thought," said Williams, "I have concluded that Wilson is the best man to nominate. I think he would be able to carry the west and would stand better in the north than any other available Democrat. He would be strong in the south."

## BREWERS TRYING TO BEAR HOP MARKET

A rather remarkable feature of the hop market at this time is the apparent apathy of the brewers. In the face of what in all quarters is conceded to be a decidedly bullish situation the consumers of hops are showing a disposition to hold off, seemingly in the belief that a little later they will be able to cover their needs for the coming year at lower prices than now prevail. That disappointment is in store for many of them is counted very probable.

Eastern orders for hops are not coming with anything like the freedom usual at this time of the year, and the obvious explanation of this is an attempt on the part of interested dealers and consumers to bear the market. The outlook for the future of the hop market, however, is anything but bearish. That the world's crop is materially short of actual requirements for the year to come has been well established. In view of this a bear campaign at this time of the year can hardly be expected to accomplish much.

There are sellers here and there at going prices—31 to 33 cents—though as yet no great pressure to unload has developed in the country," said a dealer. "But the market remains comparatively quiet. This is due to the fact that orders are not coming in from the East at the rate usually expected at this time of the year. It is clear that many of the consumers hope for lower prices later in the season, and it is quite as clear, to us at least, that in the hop situation generally there is no ground for any such hope. The chances are that many of the brewers who are now holding off against present prices will find that necessary later to pay a good deal more."

Dealers say that approximately half of the Oregon crop has passed out of the hands of growers, this including contracts closed during the growing season and sales since the harvest of the crop began. For the unsold portion the market outlook is considered favorable. The brewers on both sides of the Atlantic must soon take on supplies for the coming year.
