Mr. Kaley, an evangelist, who has come to help in the work, spoke on Sunday upon the subject of "Dedication," saying in substance that the church was the people and as each forsake their sins and followed in the footsteps of the meek and lowly one they were each and every one dedicated to the Lord, and not the senseless lumber of which the building was made. PLOWS BUILT LIKE THIS LAST & GIVE SATISFACTION WHILE THEY LAST. THIS cut illustrates one strong reason for the popularity of the J. I. Case Plow. Note how well reinforced this J. I. Case Walking Plow is, just at the points where reinforcement is needed. The J. I. Case solid steel frog securely binds the share, moldboard, and beam together making a rigid frame. The point of the share is reinforced by a piece of high-grade solid steel giving this part of the plow great durability. These are only a few of the many reasons which cause farmers everywhere to say: J. I. CASE PLOWS ARE GOOD PLOWS. Our J. I. Case Sulkes, Gangs and Walking Plows have valuable features which appeal to the intelligence and pocket book of every discriminating farmer. Frederick the Great. Frederick the Great looked with serene indifference on all that his enemies might say of him. One day, as he rode through Berlin, he saw a crowd of people staring up at something on the wall and on sending his groom to inquire what it was found it to be a caricature of himself. The placard was so high that it was difficult to read it, so Frederick ordered it to be placed lower in order that the people might not have to stretch their necks. The words were hardly spoken when with a joyous shout the placard was pulled down and torn into a thousand pieces, while a hearty cheer followed the king as he rode away. The Antiquity of Man. Man was looked upon as old when it was shown that he was contemporary with the mammoth in the glacial period, but recent discoveries prove him to be immeasurably older and to have lived with the forerunners of the mammoth, slothus antiquus and the Etruscan rhinoceros, rhinoceros etruscus. He found his way into Great Britain while the British islands were still a peninsula, and the Thames was a tributary of the Rhine, and in the ancient valley of the Thames pursued the deer or fed from the cave bear and the tiger. This we know from the bones and stone implements found in undisturbed ground far below the present surface of the soil.—Century. Strict on the Proprietries. "Now that I have given you something to eat," said the benevolent old lady, "will you not saw some wood for me?"
