LOGAN.

The Clear Creek Creamery paid 40 cents per pound to its patrons for butter fat for December.

Wednesday, January 10, Clackamas County Pomona Grange was entertained by Harding Grange No. 122. Even the inclement weather did not keep the people all at home. More than a hundred partook of the bounteous spread at noon and night. State Master Spence and wife were there, also H. G. Starkweather, of Milwaukie was in attendance, who presented a resolution condemning the single tax as a vicious form of class legislation. There was quite a discussion, but the resolution passed with a good majority. Another was one favoring Woman Suffrage in Oregon. The vote was unanimous in its favor. The last was one favoring the county purchasing and owning the Clackamas County Fair property at Canby. It was also passed. In the evening a class of seventeen took the degree of Pomona. An excellent program was rendered, including the play "A Quiet Family." All had a good time and went home tired and happy and a little sleepy, too.

W. W. Smith has contracted to lay a good gravel walk on the south side of Main street from the Congregational church to the depot. This walk will prove a great convenience to pedestrians, as the north side of the street is often very muddy and slippery.

J. T. Strite is making a great change in the appearance of the property he bought last fall from Miss Mohr. He has put a neat wire fence all around the premises, had the ground thoroughly cleared and put into good shape for setting out strawberry plants. Several carpenters are busy remodeling the house. When the interior is finished up Mr. Strite will have one of the most attractive residences in town.

There has been an epidemic of "new fencing" in this western part of our village, also many other improvements which speak well for the thrift and pride of its citizens. Eight or ten years ago Clackamas was called a dead place but that statement does not hold good at the present time.

The present high water is a hardship on many of the smaller children attending school in our district. The large girls and boys have built a sort of pond and then they catch some of the little fellows and throw them in without even giving them a chance to first take off their clothes. The little boys run into the boys' toilet for safety, but some of the larger girls as well as one of the large boys go right in and drag them out and take them to the pond and make them wade or swim. Under such circumstances we are inclined to ask, "where is the teacher?" also, "where is the supervisor?" It reminds us of our own school days twenty-five years ago.

A. I. Mason, the well known Hood River chardist, delivered a two hour lecture on apple culture to the Fruit Growers' Union at the Iones theater in Estacada last Saturday. Notwithstanding the inclemency of the weather the orchardists were out in full force.

Mason spoke from the practical side of apple culture. Mason advocated orchards of not less than 20 acres to one person, but said an orchardist must love his work and go into it as a business. He arranged the orchard promoter who divided his land into five acre tracts to sell to the credulous and added fictitious value to the acreage each year. He intimated that it was his opinion that this kind of promoting was criminal. He said his orchard netted him an average of \$433 a year per acre as an average for the six years since the trees were 8 years of age. He says that at the end of the eighth year the orchard should have paid all expenses incurred to that time. As to coddling moth with five sprayings of arsenate of lead there were 64 wormy apples in 1100 boxes of Yellow Newtons in the crop of 1906.

He did not advise planting red apples in this climate saying that the Yellow Newton and Orley were the best money makers at Hood River.

ENTERPRISE APPRECIATED.
Fall River Mills, Cal., Jan. 12, 1912. To the Editor:—The Enterprise is a welcomed weekly visitor in our home, along with three other Oregon papers and is read with interest. Although we are in sunny California our thoughts drift homeward to Oregon. We are very comfortably located in this village about 100 inhabitants, thirty-five miles from any railroad in a beautiful valley surrounded by mountains at the junction of Fall River and the Pitt river where there is a fall of sixty feet, making it noted for its natural and abundance of water power. The valley is about twenty miles square. The principal industry is hay and stock raising. Plenty of fruit and vegetables are raised to supply demands with a surplus going to waist. The climate is healthy, the air invigorating, an altitude of 2,300 feet, with Mount Shasta near. The land is productive but should be irrigated to make farming profitable. Railroad communication is badly needed. The old-fashioned stage coach is the only means of getting in and out. We are reading with interest the discussion going on in your paper on the single tax move. Keep it up and let the people become educated on this and other political lines. From our present view of thought on this subject we hope to not lose our franchise in Oregon and be there next November to vote against the single tax. We are at present small land owners, but on the small capital we have in business are willing to share our burden of taxation.

Sunny California is good but old web-foot Oregon is better.

With the best of regards to all our Oregon friends,
W. J. LEWELLEN.

The snow has all melted and left the ground well soaked with water. It seems as though there was a little misunderstanding in regards to the cougar which was killed in this town. In the first place Frank Rees found one of his sheep that had just been killed by a cougar. He phoned to Elbert Larkins to bring his dogs because they are good ones. So Larkins started with his dogs and gun and Eugene Cumins accompanied him. They went to Rees' place and the three of them started on the trail of the cougar in the deep snow. The dogs took out on the trail. Before they had treed the animal Frank Nicholas and C. Kandje, who were hunting wild cats, heard the dogs and took in with the rest, so they were having a nice time when Larkins' dog made his regular stump speech at the tree. That aroused the boys. They began a little faster. They came within about two hundred yards of the tree. Rees said, "I see him!" They went until about fifty feet of the tree. Some of the boys wanted to shoot the animal with a .22 calibre rifle. While they were arguing the point Frank Nicholas settled the question with a larger gun. Larkins thinks it was his place to shoot. The animal for his own dogs. The hide will be mounted and raffled later.
