

THE SECRET OF LONG LIFE.

Do not sap the springs of life by neglect of the human mechanism, by allowing the accumulation of poisons in the system. An imitation of Nature's method of restoring waste of tissue and impoverishment of the blood and nervous strength is to take an alternative glyceric extract (without alcohol)...

"I suffered from pain under my right shoulder blade also a very severe cough," writes Mrs. W. Dora, of New Brookland, S. C., to Dr. E. V. Pierce, Buffalo, N. Y. "I had four different doctors and none did me any good. Some said I had consumption, others said I would have to have an operation. I was bedridden, unable to sit up for six months and was nothing but a live skeleton. You advised me to take Dr. Pierce's Golden Medical Discovery and Dr. Pierce's Pleasant Pellets. When I had taken one bottle of the Discovery I could sit up for an hour at a time, and when I had taken three bottles I could do my cooking and tend to the children. I took fourteen bottles in all and was then in good health. My weight is now 167 pounds.

Mr. Nussbaum has begun to market his broccoli, taking the first load to town Thursday. Claus Peters finished hauling his potatoes to Tualatin this week. Spuds are such a good price, and have been for a few years, that farmers are liable to overdo the matter the coming summer, as a large acreage is expected to be grown, and planting high priced potatoes is rather risky business. Mrs. Fred Kollemeyer died Saturday night and was buried in the burial grounds the late Mr. Papenburg gave to the Lutheran church some years ago, on Monday afternoon. A long procession followed the remains to their last resting place, and her grave was covered with flowers contributed by loving friends. She leaves to mourn her loss, three little boys, the youngest not a year old, and her husband, who is critically ill with pneumonia, of which she died. It was a very sad occasion when the young wife and mother was borne from the home to return no more. She also leaves a mother, who is suffering with pneumonia, three sisters and four brothers, one of the latter having met an accident a few days before when his nose was broken, his wrist sprained and one leg bruised. MOLALLA.

Our valley has just the right climatic conditions for the production of many things, not the least, is our horses. For instance, our neighbor farmer, J. R. Cole, has a four year old colt as black and sleek as a mole, kind as a lamb and as gentle as a dog, seven feet tall and weighing nearly 1900 pounds. Then Mr. Cole has the champion pulling team of blacks which weighs somewhere near 1800 pounds that pulled against the ten men two seasons at our local fair, when the team started 6500 pounds of rock on a sled. The team of horses and "Colt" will pass through Oregon City in a few days enroute to Portland.

MULLINO.

Marcia has certainly done herself proud in the way of beautiful weather so far, but the prospect is somewhat lion-like this morning and a change to stormy weather is what we look for now. Everyone around this part of the country is busy plowing and getting ready for putting in the spring crops. The ground is pretty wet yet but the bright, sunny days were irresistible. A few people have made early garden while others think it is wiser to wait until the ground gets warmer.

Charlie Daniels has his new barn nearly finished and it adds greatly to the looks of his place. He has torn most of the old log barn down that was on his place and expects to take the rest of it away as soon as the new one is finished. Mrs. Shaw, the supervisor, was visiting the Evergreen school this week if all directors were as anxious and willing to carry out what they were asked to as they are at Evergreen, there would not be so much kicking done, and the people who are making the most noise are those who will not turn their hands to do a thing for their school unless they are paid. Can the superintendent or supervisor help you unless you do what you have never done before. Get busy with your hands and not with your mouths. Some school grounds are a fright and some people think that if a school house has a coat of paint on the outside that is all that is necessary. It doesn't make any difference how it looks on the inside or who teaches, and they never go to see how the school is progressing; they are too busy or do not care and because some one is hired and paid to do this work they are up in arms over it because they may have to pay 50 cents more taxes. Let us not be so selfish and narrow-minded.
