STIPP WANTS IDLE LAND CULTIVATED

THOUSANDS OF ACRES NEAR OR-EGON CITY ARE NOT BE-ING USED

LIVE WIRES WILL ACT IMMEDIATELY

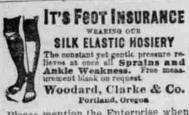

Dimick Enthuses With Glowing Description Of Prospects For Clackamas Southern Railroad

A suggestion made by Livy Stipp at the weekly luncheon of the Live Wires Tuesday that efforts be made to put into use thousands of acres of land now idle near Oregon City aroused the keenest laterest. Judge Stipp declared that if this land were cultivatd it would be the cause of Oregon City increasing in population and growing in other ways as it never had The speaker said many of the farmers near Oregon City owned tracts averaging from fifty to 150 acres and only half or less of the farms were under cultivation. The land that is not used is just as good as that which is yielding large crops and if the owners do not intend to work it, it would be to their interest, and that of the county and city to sell to persons that would,

Judge Stipp said this land should be improved as soon as possible and the Live Wires and Commercial Club should aid in the work. The sugges-tion was considered of such mportance that it was decided to consider it at the next regular meeting which will be held Tuesday evening at

Grant B. Dimick announced that Stephen Carver, of Portland, has subscribed \$45,000 stock in the Clackamas Southern Railroad and that the road would be in operation to Molalla by fall. Judge Dimick said that Carver's subscription was conditioned upon a like amount being raised by May 1. As the result of the announcement a resident of Marquam said he would subscribe \$1,000 stock. The speaker said that 10.66 miles of the grading had been completed and ties enough had been ob-tained for use from this city to Beav-

Judge Dimick was appointed a committee to draft resolutions to present at the next regular meeting regarding the proposed division of the county. He said that he had furnished the residents of the Estacada district copies of the reports as to the apportionment of taxes for road purposes and that they knew the charge made regarding that section of the county receiving its share was untrue called attention to the fact that the Sandy district paid only \$900 taxes for road purposes one year and country, thousands are driven from \$4,400 was spent on the roads there their homes by coughs and lung dithat year.

CALIFORNIA BUYING POTATOES FOR SEED

California is demanding an increasing supply of potatoes for seed. Growers are beginning to offer much more freely and for extra select stock \$2 is now being freely offered and paid. While there are reports that T. S. and Lula J. McDaniel to Ralph \$2.05 to \$2.10 had been paid at one Oregon Iron & Steel Company to \$2 could be confirmed. In fact, the Portland Cement Company, land in same growers who was taken to be confirmed. point in the Willamette valley durnickel to a dime above this being available were actually selling at \$2. This alone would indicate that the reports were warm air.

The outward movement of potatoes from the Willamette valley is now the heaviset ever known to the trade at this period of the year. Potatoes are now being shipped to all centers along the Pacific slope. Texas and Arizona are still buying, notwithstanding the assertions that the price was too high Southern California and central California are taking heavy supplies and are paying the price.

Best values are being obtained for shipments that are wanted for seed. The river district of California is this zeason a very liberal buyer of Oregon stock for that purpose and price is scarcely an object. Some of the leading growers who have a reputation for select quality along the river are said to be offering as high as \$2.25 for something better, but cannot get stock because nothing better is to

EASTERN DEMAND FOR HOGS BOOSTS PRICES

The great decrease in offerings of hoga at points east of the Rockies has caused a further advance in the price at leading centers and forced additional strength elsewhere.

The record advances in the price in the central west recently has caused much speculation among the country's trade as to the real cause of decreased showing of supplies. That weather conditions have much to do with this condition is an absolute fact, but it is now generally agreed A. L. and Katherine McKenzle to that packing interests have been too In this they have allowed their opin-

ticipation of this huge marketing, but the after returns did not bear out in the least the forecasts made by the big killers.

The Pacific coast has shown the only increase in the number of hogs produced, and it has been this heavy marketing that has forced prices to the point where, instead of showing a substantial premium over the values that ruled east of the Rockles, a decreased value has been in effect.
