

Are the Fly and Mosquito Dangerous?

The fly, with its spongy feet, collects the invisible forms of diseases, spreads them over our food and poisons us with typhoid and cholera. The mosquito with its bite injects into our veins malaria and yellow fever. The bacteria of consumption, or grip, are everywhere present for us to breathe into our lungs. The blood which flows through our veins and arteries is our protection. It should contain healthy red and white blood corpuscles—capable of warding off these disease germs. Dr. Pierce's Golden Medical Discovery is a blood medicine and alterative remedy, made entirely without alcohol, a pure glyceric extract of bloodroot, golden seal, Oregon grape root, quercus root, mandrake and stone root, which has enjoyed a Oregon grape root, quercus root, mandrake and stone root, which has enjoyed a food reputation for over forty years. The refreshing influence of this extract is like Nature's influence—the blood is bathed in the tonic which gives life to the blood—the vital force of the body braver and their increased activity consumes the tissue rubbish which has accumulated during the winter.

Dr. Pierce's Pleasant Pellets are for liver ills.
