

# TONE TO BE NEW ATTORNEY FOR CITY

### MAYOR JONES ANNOUNCES THAT HE WILL NAME SHAW POLICE CHIEF

### COCKE IS PICKED FOR SUPERVISOR

Griffith and Woodward will Succeed Green and Frost as Police men—Cooke to be Retained

John E. Jones, who becomes mayor of Oregon City today, to serve a term of one year, announced Tuesday evening that he would make the following appointments:

Chief of Police—E. L. Shaw, City Attorney—W. M. Stone, Street Supervisor—Charles C. Babcock

Night Policemen—Henry Cooke, William Griffith and George Wood.

Mr. Jones refused to say who would be appointed city engineer, but it was reported that City Engineer Montgomery would not be retained. It is believed that the council will re-elect City Stipp City Recorder.

The council committees will be announced by the mayor at a meeting of the council which probably will be held this morning. The meetings are usually held in the evenings, but owing to the fact that Mayor Jones and several members of the council wish to be out of the city tonight it was decided to hold the meeting this morning.

The eight policemen who have been serving and are not to be reappointed are S. R. Green and Jack Frost. Both are excellent records as policemen. Mr. Frost at the last city election was elected constable and will assume his new duties today. Mr. Green has not decided what he will do but he has had several offers.

William Griffith has been serving as special policeman for several weeks and George Woodward has been employed at the Willamette Pulp & Paper Mill. George L. Story is the retiring city attorney. The councilmen interviewed Tuesday evening said that the mayor's appointments would be confirmed by the council.

# MAN, DR. M'LOUGHLIN AIDED, DEAD AT 83

John R. Larkins, who died at the home of his son at Clarks December 27, was born in Ohio in 1829. He carried the plains from Illinois in 1847 with his parents, driving an ox team. Upon arriving in the Cascade mountains their teams gave out and he was left to care for two wagons. The food supply became exhausted and he started on foot for Oregon City arriving here at night. Dr. McLoughlin cared for him and sent him on the next day to Molalla where his parents had located. In 1855 he and Minerva Ward, a daughter of the late Timothy Ward, of Heaver Creek, were married. His wife at the age of 76 survives him. A son, C. N. Larkins, owns a store at Clarks. Mr. Larkins is survived by four grandchildren, E. G. and V. E. Larkins, Cora Nicholas of Highland, and Stella Graves of Canby, and he leaves six great grandchildren.

### Cannery at Mt. Pleasant

Probably the greatest boon for the Mt. Pleasant section, which is but a short distance from Oregon City, is their new cannery which is now putting its first output on the market.

This cannery is owned and operated by a stock company, the members of which are all growers and live at Mt. Pleasant. A. A. Pease is president of the new concern and P. W. Meredith is secretary. John Christensen, Robert Clark and E. E. Kellogg are stockholders and are among those who have an interest in the products of the plant.

The cannery is located on the Magnolia Fruit & Poultry Farm which is owned by John Christensen and is in the center of a fine fruit section, noted for its fine quality of berries, grapes and apples. Among the products of this cooperative cannery are: corn, string beans, plant Indian prunes, tartlett pears, prune butter, jelly, grape juice, sweet cider, vinegar, etc.

Some of these products have been sampled by representatives of "Oregon City Publicity" and pronounced to be extra fine.

"We intend to double our output next year and will add a large variety of good to our list," said H. R. Jacobson, who is interested in the cannery and is acting as traveling salesman.

This statement was made to members of the Oregon City Commercial Club who are very much pleased over the success of this new enterprise. The fact that Clackamas County has not only farmers who have the ability to produce fruit and vegetables of par excellence but also can operate their own business and sell to a good advantage, is quite gratifying to all those interested in the progress of this section.

No doubt more such plants will be installed in other neighborhoods in the near future as it is evident that the organization of a small cannery company is the means of the growers making more money. (Oregon City Publicity.)

# AN ARRIVAL EXTRAORDINARY

Prof. F. Ramsdell (direct from Europe) the world's most celebrated palmist, astrologer and clairvoyant, has arrived in this city and opened offices in the Electric Hotel Annex 524 1-2 Main Street, Rooms E and F, where he can be consulted on all the affairs of life. Prof. Ramsdell has no equal in the profession.

He stands alone, the prince of clairvoyants, and is recognized by the press and public as the greatest master of the science of palmistry and astrology the world has ever produced. He guarantees to reveal every incident of your life, tell when, whom and where you will marry, tell you just what you are fitted for and how to obtain money you are in need of. The happiness of your life may depend upon the right solution and proper advice. The professor makes no mistakes, and all his predictions are true, and he may be relied upon. You may wish to know if it is advisable to make a change in business, in love and in marriage.

WHOM SHALL I MARRY? HOW OFTEN SHALL I MARRY? SHALL I EVER BE DIVORCED? DOES ANOTHER SHARE THE LOVE THAT RIGHTFULLY BELONGS TO ME? IF SO, WHO? IS MY DISEASE INCURABLE? WHEN SHALL I LEAVE HER? AM I LIABLE TO ACCIDENT? SHOULD I INVEST MY MONEY? IN WHAT SHALL I INVEST? HAVE I ANY ENEMIES? CAN I TRUST MY FRIENDS? IN WHAT TOWN OR STATE WOULD I BE MOST SUCCESSFUL? HOW CAN I SELL PROPERTY? HOW CAN I HAVE GOOD LUCK? HOW CAN I SUCCEED IN BUSINESS? HOW CAN I MAKE MY HOME HAPPY? WHERE AND WHEN CAN I GET A GOOD POSITION? HOW CAN I MARRY THE ONE I CHOOSE? HOW CAN I MAKE ANYONE LOVE ME? HOW CAN I CONTROL ANYONE?

The professor tells of these things and many more. He is ever ready to help those with small capital to find a quick and sure investment. If your business is unsuccessful, if your health is not good, or if you are in trouble of any kind, you should see this truly gifted medium at once. He has helped thousands on the road to success, and he can and will help you. He not only tells you what your life has been and will be but also how to better your condition in every possible way. Thousands of people are failures today simply because they do not see these things for themselves, or are not following the right trade or profession.

Prof. F. Ramsdell has made a life study of these things and he is now prepared to show you how to make a thorough success of your life. His fee is reasonable and within the reach of the carrier, no matter who, and if he does not make you a reading that is superior to any you have ever had, he will positively refuse to accept any fee whatever.

Notice! All diseases diagnosed astronomically and clairvoyantly. Come, all you sick people, and I will tell you exactly what sickness you have, and will also tell you where and when you can be cured.

Office hours: 10 A. M. to 6 P. M. Sunday, 1 to 4 P. M. Lady in attendance. The reception rooms located just at the head of the stairs, are so arranged that you meet no strangers.

Perfect satisfaction by mail. Send \$1, day and date of birth, for mail reading.

Special.—Prof. F. Ramsdell is the only medium in the country who positively tells your full name, age, occupation, mother's maiden name, street and number of your house, where you live; and he will tell it free of charge to all who come prepared to take a reading. Capital furnished for business enterprises, partners found, property bought and sold, etc.

**ELECTRIC HOTEL ANNEX, 524, 1-2 MAIN STREET, ROOMS E AND F, OVER WILSON & COOKE HARDWARE STORE.**

John Milton's Cottage. One of the best preserved historic country houses in all England is John Milton's cottage at Chalfont St. Giles, which the blind and aging poet fled to when the great plague swooped down on London. That was in July, 1665, and Milton had just finished "Paradise Lost" and received a five pound note for it, with a promise of three more five pound notes if the poem sold four editions of 1,300 copies each. The cottage stands at the top of the village, and it is in practically the same condition as when Milton left it. Here the poet received his distinguished guests during the latter part of his life.

What Makes A Woman? One hundred and twenty pounds, more or less, of bone and muscle don't make a woman. It's a good foundation. Put into it health and strength, and she may rule a kingdom. But that's just what Electric letters give her. Thousands bless this for over-coming fainting and dizziness, and for dispelling weakness, nervousness, headache and tired, litted, worn out feeling. "Electric letters have done me a world of good," writes Eliza Poole, Dewey, Okla., "and I thank you, with all my heart, for making such a good medicine." Only 50c. Granted to all druggists.

# The Big Events of Interest In 1912

Photo a Taft copyright by Curtis Photos of Equitable Fire, Roosevelt and Wilson copyright by American Press Association.

January the \$100,000 Equitable building in New York was burned down. Roosevelt threw his "hat in the ring" in February. Roald Amundsen announced the discovery of the south pole in March. April witnessed the Titanic disaster. William Wright, the pioneer of aviation, died in May. Taft was re-elected in June. In July the minko of Japan died, and the following month was marked by the death of William Booth in London. America was forced to send troops to quell a Nicaraguan revolt in September. The opening engagement of the Balkan war took place in October. November saw the election of Wilson, and the house of governors met in Richmond, Va., in December.

### Money in Poultry

Mr. Christian Mier, who owns a five-acre poultry ranch near Oregon City, is a very modest man and does not like to have his achievements mentioned in the papers but with all due respect to Mr. Mier's likes and dislikes, the manager of "Oregon City Publicity" will tell of one pen of white Leghorn pullets.

This poultryman keeps a very systematic account with all of his pens of laying hens and it was the account with one of these pens that interested the Oregon City Publicity representative on a recent visit to the Mier Poultry ranch. This particular pen contained all pullets, one hundred and fifty in number and their career as layers was started under the date of October 15, 1911 and extended to the same date one year hence. In summing up the total number of eggs produced by these pullets, it was found to total 23507 eggs or 1958 11-12 dozen. A further computation will show that these one hundred and fifty pullets laid 2676 dozens of eggs or over a ton and a quarter or making an average of 19 1-2 pounds per hen. Considering that the average weight of each pullet to be about 3 1-2 pounds, it is readily seen that each had produced 5 1-2 times her own weight.

When it is considered that the little hen is producing 5 1-2 times her weight each year of products that are worth twenty cents per pound, it is a very easy matter to prove that she is on a par and even ahead of the famous dairy cows that produce twenty times their weight in milk but which sells for 2 1-2 cents per pound. So give the little hen credit for the enormous wealth she is producing each year and it will be found that the poultry industry has many merits. (Oregon City Publicity.)

### New Peacock Tail Embroidery.

Peacock embroidery has come much to the fore of late, and with some designers it is almost a fetish to introduce the "eye" of a peacock's tail feather into every scheme. There are attractive cushion covers in coarse holland crash, the peacock's tail design being worked in green, blue and gold, which is most effective, while oblongs and squares of this embroidery make charming trays, the bottom being covered with glass. Instead of investing a special tray for this purpose, in itself a usually expensive item, an excellent plan is that of fitting the embroidery like a photograph into an ordinary plain, molded picture frame and fixing two handles on either side, while the back is finished with Japanese silk.

### Cooking Hints.

Orange peel dried and grated makes a very fine yellow powder that is delicious favoring for cakes and puddings. Heat a lemon thoroughly before squeezing it and you will obtain nearly double the quantity of juice that would be obtained if it were not heated.

Rice boiled in milk instead of water has a much richer taste. It must be watched closely while cooking, as it burns quicker when cooked in the milk.

If you rise a plate with cold water before breaking the eggs on it, add to them a pinch of salt and then stand the eggs where there is a strong current of air you will have no difficulty in beating them to a froth.

The Good Fellow. "He's what I call a good fellow." "At home or at the club?"—Exchange

## For the Children

Juliana, Holland Princess. Who Wants a Playmate.

Princess Juliana, heiress apparent to the throne of the Netherlands (or kingdom of Holland), is getting to be a big girl now. She will be four years, old next April. Lately she surprised her mother, Queen Wilhelmina, by asking for a baby brother to play with.

The little Princess Juliana is the pride of the Dutch people, for she is the only child of the queen and therefore is now the nearest heir to the throne of the Netherlands. She likes to play like other little girls, and to help her be happy her mother bought a pony for her. That may seem to be nothing especially strange, since there are plenty of other little girls who have ponies. But this is a special kind of pony. It is the smallest pony that was exhibited at a recent great horse show in England. It stands just thirty inches high, and it is brown and as woolly as a collie dog. A carriage has been made to fit the pony's size, and the little princess is now able to go driving in the park.

### Disappearing Pile of Coins.

A number of coins are shown lying on a plate, piled up, taken in the left hand where they are seen, and the hand is closed over them. A handkerchief is thrown over the hand, and when removed the coins have disappeared.

Show a quantity of loose coins on a plate. Pile them up and while so doing palm a dummy "stack" in the left hand. Pretend to pass loose coins to the left hand, palming and dropping them in a box of bran, so that they will sink slowly and without noise. Borrow a handkerchief, show the dummy, grasp the handkerchief by the center of one side and then spread it out over the left hand and while so doing throw the dummy into the right, the handkerchief hiding its flight. Pick up the wand, in the act of which drop the dummy on the table, touch the handkerchief with it, place it under your arm and draw off the handkerchief and show it and the hands empty.

Life Lengths of Lowly Things. It has just been computed that the day fly lives 24 hours, the May fly 6 weeks, the butterfly two months, the bee, the cricket and the bee a year each, the hare and sheep 6 to 10 years, the wolf 12 to 15 years, the canary bird 15 to 20 years and the nightingale 12 years.

The dog lives 15 to 25 years, cattle 25 years, the horse 25 to 30 years, the eagle 20 years, the star 35 to 40 years, heron, lion and bear 50 years each, the raven 80 years, elephant, turtle, parrot, pike and carp 100 years each.

The ivy outlives 200 years, the elm 300 to 500 years, the linden 500 to 1000 years.

### Why We Can See Smoke.

Smoke is not composed of gases only, but of solid or perhaps partly liquid particles which are mixed with the gases and carried along by them. It is these particles of matter that are visible to the eye and not the gases themselves.—St. Nicholas

### Winter Quarters.

Where's the crawling caterpillar? Sound asleep in his cocoon. Where's the bee so bright and busy? Dreaming in the hive of June. Where's the snail and where's the turtle? Safely buried in the ground. Where's the woodchuck? Where's the rabbit? In their burrows they are found. Where's the thrush, and where's the robin? Singing 'neath the southern sky. Where's the bear, and where's the squirrel? In their hollow tree they lie. Where's the ant, that careful worker? In her underground abode. Where's the slightly-eyed spinning spider? In a crevice snugly stowed. Where's the bat that ranges at midnight? He is in his winter's sleep. In his cave he hangs head downward, And he never takes a peep. These and many other creatures Hide or hibernate the winter through. But when spring has once awakened They are up and stirring too. —Farm Journal.

### HARVESTING ALFALFA

Reply to John McGeary, Canfield, Arkansas

"Can you tell me when to cut alfalfa so as not to injure the succeeding crop? When is the best time to harvest red clover for hay?"

The usual practice is to cut alfalfa when about one-tenth of the plants are in bloom, and if cut at this stage there will not be so much danger of injuring the next crop as if permitted to stand longer. From the standpoint of feeding value it will not decrease to any great extent if the field is permitted to fall bloom. Fed alfalfa should be harvested when the plants are in bloom. It may be cut when the plants are in bloom, but it is better to cut when the plants are in bloom. The alfalfa may be dried with small fires.

For a Christmas tree centerpiece place a small Christmas tree in the center of the table and bank around it apples, oranges, grapes and nuts. The tree may be arranged Christmas eve and serve as a table decoration as well as a place for the gifts, or it may be trimmed with small papers and other usual Christmas decorations and serve as decoration only.

Individual Christmas trees may be placed in this decorated covered with green paper and set at each place. These may hold gifts or favors for a person. Small papers are fastened to each tree and furnish the host with the address of the guest.

### AID THE KID EYS.

Do Not Endanger Life. When an Oregon City Citizen Shows You the Way to Avoid It.

Why all people continue to suffer the agonies of kidney complaint, headache, urinary disorders, lumbago, backache, neuralgia, who allow themselves to be made chronic sufferers, when a tested remedy is offered them. Doan's Kidney Pills have been used in kidney trouble over 30 years, have been tested in thousands of cases.

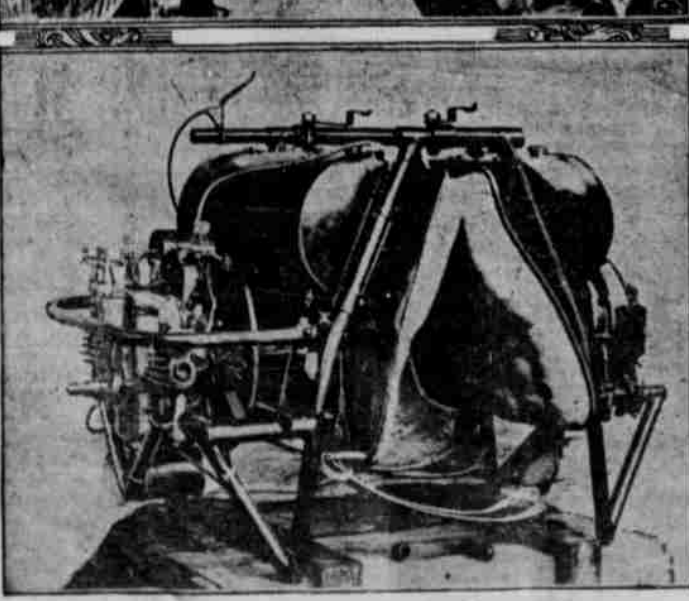

If you have any, even one of the symptoms of kidney disease, act now. Dropsy or Bright's disease may set in and make neglect dangerous. Read this Oregon City testimony:

Mrs. L. B. Talley, 901 Eleventh St., Oregon City, Ore., says: "Doan's Kidney Pills brought me prompt relief from a most annoying attack of kidney complaint and backache. Others of my family have taken Doan's Kidney Pills with the best results."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

### War Wireless on Horseback; Turks Flee, Bag and Baggage

Photos by American Press Association

WIRELESS played an important part in the Balkan war. The Bulgarians transported their apparatus in an ingenious manner, fitting them on large saddles, which were placed on the backs of the horses. An arrangement of this kind is shown in the lower picture. In the upper view may be seen frightened Turks in a wild scramble on the quays of Stamboul waiting to be taken by ferry, bag and baggage, back to Asia Minor, whence they originally came.

# WATER DISCUSSED BY LIVE WIRES

### FURTHER CONSIDERATION TO BE GIVEN SUBJECT AT NEXT LUNCHEON

### PETITION FOR CHANGE IS PRESENTED

Council Committee on Health Announces Investigation is Near. End—Report Will be Made

The water situation in Oregon City has been made a special order for next Tuesday evening by the Live Wires of the Oregon City Commercial Club. The weekly luncheon has been secured for 6:30 o'clock, and the remainder of the evening, or as much of it as is necessary, will be devoted toward a free and full discussion of the question of obtaining pure water for the residents of the city. The matter came up at Thursday's luncheon by the presentation of a petition, signed by 200 of the leading business and professional men of the city, and F. J. Toole, chairman of the council committee on health and police, stated an investigation of a pure water supply was already under way, and that a great deal of valuable and interesting information was being obtained. His report will be ready for presentation at next week's meeting of the Live Wires.

The quarterly election of officers resulted as follows: Main Trunk Line, Harvey E. Cross; Sub-Trunk, E. Kenneth Stanton; Transmission Wire, Live Stipp; Gay Wire, Frank Busch; Feed Wire, F. A. Olmsted.

The probe of the Live Wires into the water question will be made without bias with the sole interest of Oregon City at heart and it is expected the results will be satisfactory. The petition, which is addressed to the City Council, as well as to the Commercial Club and the Live Wires, contains a request for a special bond election.

The following letter from R. B. Beattie, County Judge, was read by Main Trunk Line Sullivan:

"I wish to thank the Live Wires of Oregon City through you for their indorsement of my application for United States Marshal of Oregon. As you know, the indorsement was entirely unsolicited, and therefore appreciated all the more.

"It is a pleasure and a gratification to me to have the confidence of my fellow citizens of the Live Wires, although many of them differ from me politically, and I hope to show them, in case of my appointment, that that confidence was not misplaced.

"One of the things that especially appealed to me was Mr. McBain's statement in introducing the resolution that, although he and many other members held to a different political faith, inasmuch as the Democrats had gained control of the National Government my appointment should be urged above other applicants for the marshalship.

"As County Judge I have tried to cooperate, as far as possible, with your live commercial organization, which has been of such vast benefit to the city and county, and, if named United States Marshal, I give you my positive assurance that I shall continue such cooperation.

"It is incumbent upon all residents of Clackamas County and Oregon City to work together for a greater county and city, and I would consider myself a traitor to both, if, as United States Marshal, I did not do what I could for home people."

# WORKMEN'S INSURANCE BEATS INDEMNITY

The Workmen's Compensation Committee of Oregon is sending out a pamphlet, compiled from the annual report of the State of Washington's Industrial Insurance Commission, and the results of the first year's operation of the Workmen's Compensation Act. It is notable that the administration of the act has been less than the state of the industrial insurance companies are paying to obtain new business.

The following is a summary of the first year's operation: September 30, 1911, to September 30, 1912. Total number of accidents reported: 1,750. Total amount of compensation paid: \$1,000,000. Total amount of contributions received: \$1,200,000. Total amount of surplus: \$200,000.
