The Rosecrans is a total wreck. Her captain, J. F. Johnson, and three other dead bodies have been picked up by the lifesaving crew.

For five hours after the distress signal was flashed from the Rosecrans the liferaving stations at Cape Disappointment and Point Adams exerted every energy to reach the strickon vessel, but the heavy weather and fierce gale baffled at every turn.

The tugs Fearless and Onconta, I with the Cape Disappointment lifesaving crew, were forced to turn back to Fort Canby. At 9:10 the naval radio station located the wreck and by radio gave the tugs the location.

The rescue work was the most perilous undertaken at Columbia har in its history. It was only when a lull in the storm occurred about noon that the lifesaving crews were able make to the scene of the wreck and then the gale was so furious that it was impossible to get within 400 yards of the wreckage. In the wild breakers three of the crew of the lifesavers were washed overboard but were rescued. The men who had clung to the mast of the Rosecrans jumped into the water and were say
