MARSHBURG

True to ancient tradition, the first week of 1913 with its banishing day, brought strengthening cold, despite the frozen aspect, however, out of door work has gone on with a vigor that must certainly make itself apparent in the coming spring. Everywhere is heard the stroke of the sleds and wedge, the sound of the gruit hew and at intervals the blast of dynamite shattering the mammoth stumps. All this added to the illumination of the rubbish fore tells that soon the long stretches of unbroken land in this new region will give place to the succession of cultivated fields that meet the eye of the travelers in crossing our continent. The activity in agricultural advance is greatly stimulated by the unflinching account that comes to us weekly of the steady approach of the Portland, Eugene & Eastern Railway. The road is to furnish market for our produce and connect us with the outside world. In the long rainy season, we long for the comfort of the railroad car which cannot be found in any other vehicle and Mackay has every promise that luxury is to be hers at no very distant day.

The Clackamas public school opened Thursday, January 3, with a full attendance, notwithstanding the inclement weather.

The saw mills continue a double debt to pay. Not only are they turning out building material, thus furnishing employment to men, but they are providing excellent substance for side walks, so necessary in a rainy season. The masses of saw dust that before went to waste, are now utilized in changing almost impassable walks to comfortable footpaths. True, they will have to be renewed each year but if—as we wish—the mills continue their present output the supply will be unending.

MACKSBURG

The annual January freeze lasted the traditional three days, and was succeeded by a rain so warm that the atmosphere seemed filled with suggestions of Spring. The twitter of the meadowlarks and the swelling of the pussy-willow buds too, speak of the Winter's decline. The signs of approaching Spring lend new import to the ranchman's zeal in the clearing of the land. Everywhere the main roads are disappearing, while in their place are scores of piles of cordwood. The stumps yield to dynamite and the jungles of underbrush give way before the constantly glowing fire.

The regular sound of the whistles tells that the sawmills are keeping up their work.

A case of scarlatina has broken out in the family of Mr. Marshburner who lives in the Ely school district. As quite a number of the pupils were ill and showing symptoms that held possibility of developing into the same disease it was thought best to close the school on Thursday, Jan. 10th, to reopen as soon as all danger of contagion is past.
