RECORDS OF P. R. L. & P. DESTROYED BY FIRE
Fire, presumably caused by crossed wires during the heavy snow storm consumed the office of the Portland Railway, Light & Power Company's engineers at the upper dam, two miles above Casadero, destroying records worth several thousand dollars. The building itself was of little value. Among the records burned were the water gauges of the Clackamas River during the past two years, the surveys and plats of the proposed extension of the line above the present terminus and plats of the power plant near Casadero. It is said there are no duplicates in existence, thus making it necessary to resurvey the country toward the mountains as well as to secure additional records of the rise and fall of the river.

If upon reading, the explanation warrants the attraction—we are impressed and glad our attention was called to it.

DEAFNESS CANNOT BE CURED
By real explanation, as they point out the diseased part of the ear. There is only one way to cure deafness, and that is by substituting the hearing of the ear with the hearing of the eye. This is done by the use of the "Hear-It" system, which is a scientific method of hearing, and which is entirely new, because it does not depend upon the hearing of the ear, but upon the hearing of the eye. This system is the only one that has been shown to be successful in curing deafness. MILL HOME SITE TO HAVE WELL WATER

The Willamette Pulp & Paper Company has contracted with an Oregon City contractor to bore six wells 200 feet deep on the newly platted home tract on the West Side, known as Willamette Heights. It is also possible that a large enough flow will be found to take care of Oregon City's present need.

The first well will be bored near the West Side Hill school home where there are very valuable springs and artesian water. This tract is to be provided with a sewerage system, perfectly pure water, paved streets, electric lights and sidewalks and it is expected many homes will be built by the company before Fall for its employees. SHEWMAN POINTS OUT STATE'S NEED

EDITOR OF LIVE STOCK JOURNAL TELLS HOW MILLIONS ARE WASTED

BILL FOR AIDING FAIRS IS UPHOLD

Sullivan Suggests that Members of Wires Aid in Fostering Facilities and Live Stock Raising

Dairy products valued at \$12,000,000 and swine on the hoof valued at \$6,000,000 were brought into Oregon last year from the East for consumption in this state. This statement was made with electrifying effect Tuesday at the weekly luncheon of the Live Wires of the Oregon City Commercial Club by W. A. Shevman, editor of the Western Stock Journal, who has made a close study of the livestock industry in the Northwest.

He said the total value of livestock products and of products of an agricultural character shipped into Oregon in 1912 amounted to \$25,000,000, and into Washington the value was \$30,000,000. He told of conditions in Washington towns, notably Pullman, and explained how money could be made by the farmers in producing pure bred swine. Mr. Shevman was followed by T. W. Sullivan, O. D. Eby, H. E. Cross, J. E. Hodges, A. A. Price, C. H. Dye and L. L. Pickens, who talked in the need of an Army, which could be used for holding Dairy and Stock Shows, as well as for other purposes.

O. D. Eby and T. W. Sullivan proposed a resolution opposing the bill to repeal the law of 1911, under which county courts are authorized to spend \$50 per county to assist fairs and shows, in cases where sites have been secured and buildings are maintained. The resolution obtained the unanimous endorsement of the Live Wires.

M. D. Latourette announced it is the purpose of the Promotion Department of the Commercial Club to hold a Booster Day in Oregon City during April or May and that the celebration might work hand in hand with a Live Stock Show.

A. A. Price, who heads the committee to secure cluster lights along Main Street, reported progress. It is the purpose of this committee to induce property owners and business men in the retail district on Main Street to install cluster lights, keeping pace with other Willamette Valley towns.

Declaring that the business interests of Oregon City could do a great deal toward cooperating with the farmer in producing more stock, T. W. Sullivan said every thing possible should be done to foster manufacturing concerns and stock raising. He said the various manufacturing concerns of the city are well able to look after their own interests without assistance, unless hampered by inane and destructive legislation. This was a pointed reference to the Dimick and Schuebel labor bills pending in the legislature.

F. A. Olmsted, a chemist, made a report on the city water consigned to his care for examination at the former meeting of the Live Wires. He said a bacteriological examination had not disclosed the presence of coliform bacilli.

The following standing committees were named by Main Trunk Line Cross:

Public dock—R. T. McEain, M. J. Brown, E. E. Brodie.
City hall—John W. Loder.
Dairying and hogs—W. A. Shevman, A. L. Beattie, M. J. Lazelle.
Main street pavement—M. D. Latourette.

Weights and measures—J. E. Hodges.
Good roads—T. P. Randall, E. E. Brodie, Livy Stipp.
Sheep and goat raising—T. J. Gary, O. E. Freytag.

The fire was discovered about 1 o'clock by John Brooks, an employe, who lives near the office. By the time he reached the building the interior was ablaze and he was unable to save any of the contents.

This is the third fire that the Portland Railway, Light & Power Company has suffered within the last six months.
