### Made with different Baking Powders

#### From a Series of Elaborate Chemical Tests :

An equal quantity of bread (biscuit) was made with each of three different kinds of baking powdercream of tartar, phosphate, and alum-and submitted separately to the action of the digestive fluid, each for the same length of time.

The relative percentage of the food digested is shown as follows:

Bread made with

**Royal Cream of Tartar Powder:** 100 Per Cent. Digested

Bread made with

phosphate powder:

681/4 Per Cent. Digested

Bread made with alum powder:

67% Per Cent. Digested

These tests, which are absolutely reliable and unprejudiced, make plain a fact of great importance to everyone: Food raised with Royal, a cream of tartar Baking Powder, is shown to be entirely digestible, while the alum and phosphate powders are found to largely retard the digestion of the food made from

Undigested food is not only wasted food, but it is the source of very many bodily ailments.

## THIS BANK AND YOUR SUCCESS

Many men have started in business with a capital only of ability, hard work, honesty and a good reputation. An important factor to their success in almost every instance, you will find, was their bank account. Their bank deposits may not have been large, but their connection with the bank, coupled with their energy, honesty and character was the basis of the credit they were able to establish, and through credit success was possible. In starting out for yourself an account with this bank will be a help to you in many ways.

# Pocketbook of the Wife **Our Most Serious** Problem

By JAMES J. HILL, Railroad Builder of the Northwest

N the growth of the American republic we have regarded the tarifl as of serious importance. We have political questions which seriously disturb business situations,

BUT THERE IS NOTHING MORE IMPORTANT IN THIS NATION OR THE LIFE OF ANY OTHER NATION THAN THE POCK ETBOOK OF THE WIFE, . .

We do not produce as much as we might, BECAUSE MEN AND WOMEN ARE LAZY WITH FARM LAND and do not take the best advantage of their opportunity. If they did beef would he cheaper, flour much lower in price and the green vegetable supply far greater than at the present time.

Yet there is another point to be considered, a point which I have considered for more than forty years in developing a railway system. and that is how wisely or how ignorantly the woman of the farm, the wife. HANDLES THE POCKETBOOK which is under her control

The original question of social economics which we have to consider at the present time is not the tariff or the finances of one of the richest governments in the world, but THE POCKETBOOK OF THE WIFE. I emphatically state that I do not mean the pocketbook of the husband, the earning factor of the family, but the pocketbook of the wife, who has THE HOME AND THE CHILDREN UNDER HER CONTROL.
