WATER TESTS ARE URGED BY EXPERT

MAN EMPLOYED BY COMMISSION INSISTS UPON FREQUENT ANALYSES
SYSTEM COULD BE MADE PERFECT
J. H. Brewster, in Frank Statement, Says Supervision of Plant is Materially Deficient

J. H. Brewster, a famous sanitary engineer of Portland, has made a report regarding the Oregon City water. Mr. Brewster was employed to make an investigation of the water by the Board of Water Commissioners. He says in part: "The supply is taken from the Willamette River at a distance approximately 1900 feet from the plant. The intake is located on the bank of the river about 300 feet above that portion of the falls where the Hawley Pulp & Paper Company have installed power wheels. The mouth which is 22 inches in diameter, is covered with a removable one-fourth inch mesh screen. It is enclosed in a concrete box which is of sufficient size to reach the surface at mean water level and having its only opening on the mesh down stream level. This is covered with an iron grating in order to keep fish, sticks, leaves, etc., from entering the intake." Mr. Brewster makes a detailed story of the filtration plants and adds: "Regarding the operation, with but few exceptions, the general procedure is carried on correctly. It has been found, however, that No. 4 filter which contains eight inches of gravel will operate more rapidly than the other three which contain no gravel when the outlets have separate ratings in order to have the water evenly distributed. It was also found that when the river was carrying considerable silt and the filter became stopped up more readily than at other times it was customary to rake the top of the beds before washing. An explanation was given the superintendent why this was not conducive to efficient operation and the practice has since been discontinued.

CITY HAS FIRST SPRING DAY OF YEAR

Spring was certainly a welcome visitor to Oregon City Saturday and all day long the city by the Falls was basked in the warm February sunshine that might have done honor to the sunny South, and far eclipsed anything on a February day that California ever boasted of.
