An energetic peddler, traveling with

his automobile arranged for a kitchen and sleeping room appeared last week. He stops at some convenient place, and taking his paper sack of notions goes here and there traveling on both sides with his source of supplies, and seems to be making good at it. He holds his wares high, but often makes a sale. Among his best sellers appear to be combs, which he declares will make hair grow on a bald head, in proof of which he lifts his hat a little way showing some shiny black hairs combed smoothly back from his forehead, but a lady said he chanced to lay off his hat, and she saw the crown of his head was perfectly bald. Perhaps his comb had not hit that spot yet. Let us be charitable.

MACKSBURG.

The fruit growers of this vicinity are resting securely in the hope of an abundant crop the coming fall, despite the delusive warmth of the April day. The bright sunshine might seem likely to lure the birds from their winter quarters too early for safety were it not for the chilly—

Poultry Fencing One Or Two Generations Ago Most Farm Animals Roamed At Large But We Have Gradually Found That This Did Not Pay The barn yard fowls have been the last to feel the effects of business methods on the farm but at last they have to get in their place (in the poultry yard) and stay there. The farmer who reads the magazine knows that today many a chicken farm of a few acres pays a bigger profit than a big farm did a few years ago. Every farmer keeps chickens because it pays and it will pay lots better and the farm will look better if they are kept in the poultry yard. They are about the most profitable animals on the farm and it takes less space and less expense to keep them. Enough of our poultry fencing to keep your fowls properly will cost very little and will be the best investment you ever made on the farm. Ask for prices. FRANK BUSCH Furniture and Hardware
