ACTION ON PAVING 7TH STREET WAITS

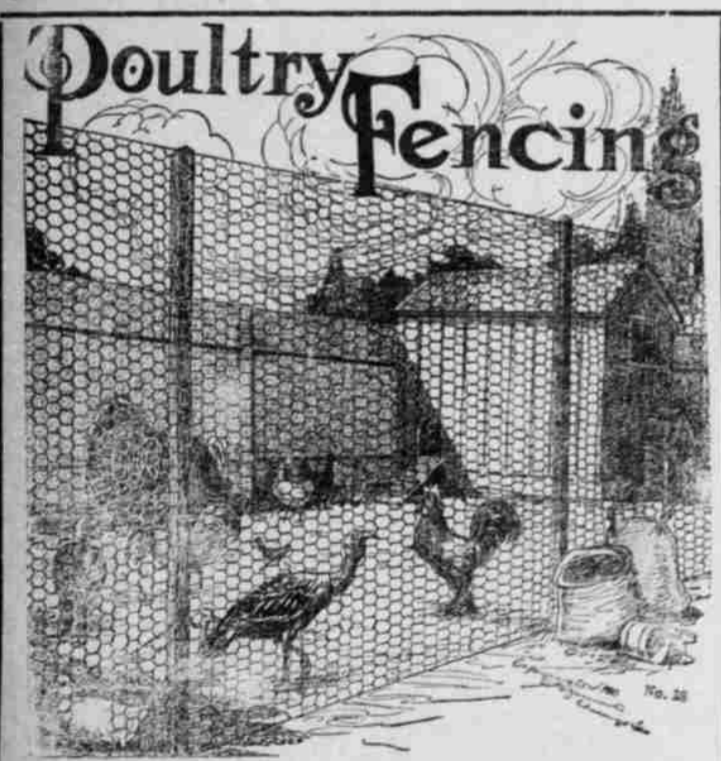

Aside from the consideration of plans for the Seventh street drainage system, Wednesday night's council session was a reasonably tame and quiet affair. There was some of the fireworks that have enlivened recent meetings, and even Councilman Toole seemed to take less interest in the proceedings than usual. It is true that Mr. Toole was on his feet about as much as usual, but most of the time he merely rose to ask questions that would shed further light upon matters under discussion. There was barely a quorum present, and this added somewhat to the serenity of the occasion, for the warring factions were without leaders.

Plans and specifications for the improvement with hard surface paving action on the matter was deferred until the sewer question was settled. There was also a display of paving bricks, and property owners and councilmen joined in a discussion of various forms of hard surface material.

Routine matters were taken up, and went mostly to committees.

A final quietus was placed upon the saloon question that has lately disturbed the council by a report from City Attorney Wilson, who informed the lawmakers that the city could not grant special short-term licenses to three saloonmen recently denied licenses, and who added the information that if these men still retained their federal license they could sell liquors in quantities of not less than one gallon nor over four and seven-eighths gallons, provided the matter was not absorbed on the premises or resold later.

One Or Two Generations Ago Most Farm Animals Roamed At Large But We Have Gradually Found That This Did Not Pay

The barn yard fowls have been the last to feel the effects of business methods on the farm but at last they have to get in their place (in the poultry yard) and stay there. The farmer who reads the magazines knows that today many a chicken farm of a few acres pays a bigger profit than a big farm did a few years ago. Every farmer keeps chickens because it pays and it will pay lots better and the farm will look better if they are kept in the poultry yard.

Enough of our poultry fencing to keep your fowls properly will cost very little and will be the best investment you ever made on the farm. Ask for prices.

The people that put Mrs. Seward's house into its new place was one of three such gatherings that took place in Macksburg last week. One was a top-rolling for Frank Hilton. About the same force of workers met at Wesley Eby's on Saturday and did a like amount of work. For the uninitiated it must be impossible to imagine the genuine delight that prevails in these rural functions. Meeting, as they do, at a neighbor's house, performing some herculean task made light by many willing hands, partak-
