DON'T LET BABY SUFFER WITH ECZEMA AND SKIN ERUPTIONS

Babies need a perfect skin-covering. Skin eruption causes them not only intense suffering, but hinders their growth.

DR. ROBSON'S ECZEMA OINTMENT can be relied on for brief and permanent cure of suffering babies whose skin eruptions have made their life miserable. "Our baby was afflicted with breaking out of the skin all over the face and scalp. Doctors and skin specialists failed to help. We tried Dr. Robson's Eczema Ointment and were overjoyed to see baby completely cured before one box was used."

The Fox in the Orient.

The fox or jackal is united by no considerations of nationality or faith. It is the almost universal head covering of the eastern and southern lands of the Mediterranean and has been widely distributed in the still active diffusion of Mohammedanism. This type of felt hat without brim is of the utmost antiquity and seems to have undergone no marked change save the tassel from the early monumental record of the Euphrates valley. The designation fox, comparatively modern in its application, derives from the fact of that name, which was long considered the only source of dyestuffs which could give the peculiar shade of red soot favored.—New York Sun.

Siege of Gibraltar. There have been many sieges of the famous rock of Gibraltar, but the greatest was the one sustained from the combined land and sea forces of France and Spain, 1779-83. For four years all the powers and resources of the science of the time were exhausted by the assailants without success. Under the inspiring leadership of Sir George Elliot the besieged more than held their own in one of the most memorable sieges in all history.—Pearson's Weekly.

Arctic Iron Mine.

The richest and perhaps largest iron ore mine in the world is at Kiruna, Lapland, as far north as northernmost Alaska. The climate is milder than that of Alaska, and the mine is worked the year around.

Most Ancient Music.

The most ancient piece of English music in existence, "Summer is Iemen In," is quite modern in comparison with a score of the "Orestes" of Euripides, dating from the fourth century B. C., which was exhibited at the international exhibition of music at Vienna some years ago. Even more ancient is the chant "The Blessing of the Priests," which was sung in the temple of Jerusalem before the captivity and is still in use in the Jewish synagogues in Spain and Portugal.

THREE THOUSAND ARTIFICIAL LEGS. From Europe comes a bit of news well calculated to make an American grateful for his citizenship in this country. It brings vividly and forcibly to mind the atrocities of warfare such as that of the Italian states. It makes the old man here think of the time when he or his friend and comrade came back maimed and mutilated from the battlefields of the civil war. Here is the item: A "government now engaged in war" advertises in a German paper for 2,000 artificial legs. They are wanted to replace those torn off by shrapnel and shell or smashed by rifle bullet or ridden over by artillery wheels or the terrible hoofs of charging cavalry. Three thousand artificial legs: Think of the aggregate of misery they represent! Once there were 2,000 natural legs which bore their possessors proudly to war. They marched away from home, just as you and I, reader, leave our own homes to go to our daily toil. Now the legs lie rotting in Balkan battlefields with the bodies of thousands who, perhaps more mercifully, have been spared the pain and perils of continued lives with limbs lopped off. As careless boys, unbending in their pain, twist and pull off the parts of insects, so these limbs of men have been twisted and torn off to gratify the war-makers, the lusters after territory, the proud and ambitious. Think of those 2,000 artificial limbs! Was Sherman right in his characterization of war? "But we do not make war," the readers say. "It is made by the statesmen, who do not send men to death and wounds unless there is no other way open." The other way is opening. It leads men along the path of international arbitration, of discussion of differences. In this highest and most honorable of national and international pursuits our own government is a leader. Statesmen and kings and governments do not nowadays make war. It is waged by the people themselves, and theirs is the final decision in the momentous question, "War or peace?" If the voice of a nation is unmistakably opposed to war no president, king or emperor will coerce it into the ways of slaughter of fellow men. Only the people themselves can take that road. In the cause of international peace all can help. If throughout the world the people of hamlet and village and town and city join with one voice in denouncing war there will be no more war.

LONDON "PEA SOUP." Mists and Fogs So Thick That They Turn Day into Night. London and Londoners have been the butt of many a good joke, but perhaps the oldest subject of the humorist is the London fog. The mist, which is commonly called "pea soup," dates back to the seventeenth century. There are records as far back as that which indicate that the city suffered even in those days from mists as intense as any of those of today. In November, 1699, John Evelyn made a note in his diary to the effect that there was "so thick a mist and fog that people lost their way in the streets, it being so intense that no light of candle or torches yielded any direction. Robberies are committed between the very lights which are fixed between London and Kensington on both sides and while coaches and passengers were passing. It began about 4 in the afternoon and was gone by night. At the Thames they beat drums to direct the watermen to make the shore." Visitors to London in those days were in the habit of making fun of the fog just as the visitors of today. Condemna, Spanish ambassador in Queen Elizabeth's time, said to a friend who was returning to Spain, "My compliments to the sun, whom I have not seen since I came to England." In Elizabeth's time the burning of coal was prohibited while parliament was in session. So dense were the fogs during the years of 1813 and 1814 that when the prince regent tried to make his way to Hatfield, the home of Lord Salisbury, he could not find his way and was compelled to forego the trip and return to Carlton House, which he reached after a succession of accidents.—New York Sun.

Reciprocated. "I'm sorry I snubbed that young bank clerk on the street yesterday." "Failed to know him, eh?" "Yes; and today he got even. I had a check to cash, and he failed to know me."—Washington Herald.

On the Water Wagon Too. "Don't you think man is greatly influenced by his environment?" "Not always. I once knew a man who drove a sprinkling cart for nine years and died of acute alcoholism."—Birmingham Age-Herald.
