The Blizzard Silo Filler Is the Thing There is no question about the value of silage for feed and the Blizzard Ensilage is a good investment for the farmers of the Northwest for still another reason. It enables them to put away the crop when it should be put away, regardless of weather condition. Many crops could have been saved in the past few years if farms on which the loss occured had been equipped with a silo and Blizzard Silo Filler.

Portland, Oregon. Gentlemen: We have used your Blizzard ensilage cutter the past season and find them a very satisfactory machine in every way. We put up ov-er 600 tons of corn and had no trouble cutting from 50 to 55 tons per day and elevating it to a height of 32 feet, using an 1.15 machine. We consider them the best machine made for the purpose. We also used it to cut alfaita and clover hay feel to sheep and cattle at our yards this Winter, and it handled the work in good shape.
