LABOR TROUBLES OVER, MILL OPENS

A settlement was reached between the employees of the L. R. Menefee Lumber company and the mill management Monday and the mill opened Monday morning and operated all day at full capacity.

The mill which is located at Millwaite, was shut down two weeks ago because of a strike on the part of the employees. Thomas Haddy, a sawyer, was discharged by the mill manager, on the grounds that he was unable to do the required amount of work. The other employees, in sympathy, went out on a strike and the mill management refused to consider their demands at first. A compromise was reached sometime the latter part of last week and Haddy was sent to one of the company's mills in Washington.

The Blizzard Silo Filler Is the Thing

There is no question about the value of silage for feed and the Blizzard Ensilage is a good investment for the farmers of the Northwest for still another reason. It enables them to put away the crop when it should be put away, regardless of weather condition. Many crops could have been saved in the past few years if farms on which the loss occurred had been equipped with a silo and Blizzard Silo Filler.

Photo Taken May 20, 1914, on the Farm of Streich & Neiger, Clatsop, Oregon.

THE BLIZZARD IS A TIME TRIED MACHINE

Don't make the mistake of buying a silo filler of questionable merit.

They cost nearly as much in the beginning and far more in the long run, or short run, for that matter. The Blizzard is a practical machine. It combines knives, fan and fly wheel instead of using these as separate units, thereby saving power and making a more compact cutter. It elevates without fall into the tallest silo. It cuts the material with a shear cut, does not crush it. The Blizzard is responsive to control and safe to operate. The Blizzard is widely imitated, but nothing can shake its popularity with those who have used them.

FINDS IT VERY SATISFACTORY

Cleone, Oregon, May 2, 1913.

Mitchell, Lewis & Staver Co., Portland, Oregon.

Gentlemen: We have used your Blizzard ensilage cutter the past season and find them a very satisfactory machine in every way. We put up over 600 tons of corn and had no trouble cutting from 50 to 55 tons per day and elevating it to a height of 32 feet, using an L-15 machine. We consider them the best machine made for the purpose. We also used it to cut alfalfa and clover hay fed to sheep and cattle at our yards this winter, and it handled the work in good shape.

Yours truly, THE SUN DIAL RANCH,
By E. G. McGaw.

Why Silage Pays

If you want to know how much the silo filler will do for you, send in the coupon for this book. State the size of your silo, and we will quote you. It places you under no obligation to buy.
