ENDLESS CHAIN WAY TO SURE PROSPERITY

INVESTORS BUILD UP WEALTH ON FOUNDATION OF SAFE INVESTMENTS

A New York man who had saved a acts mother and wanted to invest it pognit advice from the manager of pre bank, says the New York Times. want to put this money where it will be absolutely safe," he explained. "I want something in the line of securities, something that won't require any attention from me, something that I won't have to worry about, that will bring me in an income and that at the same time will combine the security of an Investment with the excitement of a speculation."

"That is a rather large order," commented the banker. "You seem to want to eat your bread and keep it It can't be done. If you buy stocks or bonds you've got to be either an investor or a speculator. There is no safe middle ground where you can be both investor and speculator.

Now, my friend, let me tell you a true story. It may do you some good. It's about a man I know, now a solid citizen of this neighborhood, who twenty years ago was in very much the same situation as you are at this mintite. He had saved a little money and wanted to invest it. He wanted both an investment and a speculation, but he concluded that they wouldn't mix any more than oil and water, so he decided to confine himself to investment. Safety first-that was his idea, and it was a mighty good one.

"He had about \$1,000, and with that he bought a good, safe railroad bond that brought him in 5 per cent on the amount invested. Next year he saved another \$1,000 and bought another bond-not of the same issue, because he didn't want to put all his eggs in the same basket.

Every year since then he has saved \$1,000 and bought a bond.

The income from his bonds he has invested each year in good, safe, dividend paying preferred stock, something that would bring him in an average of between 6 and 7 per cent on the smount invested. For instance, the first year of his career as a bondholder he received something like \$50 in interest. He put that in the savings bank, where in the course of the next year it earned him \$2. The second year he had, of course, two bonds, and the interest amounted to something like \$100. With that and a little more from his savings he bought his first share of preferred stock.

"He has followed the same plan ever since. As soon as he gets the interest from his bonds into his hands he buys preferred stock-buys it outright. "All these years, of course, our

friend has been receiving an income from his preferred stock. At first all he had was one share, and that brought him in only about \$7 a year. But gradually as he has increased his holdings of preferred stock, his income from that source has grown, and now it is considerable. All that his preferred stock has brought him in he has invested in dividend paying common stock.

"His common stock brings him in a little more than 8 per cent. Investing in common stock, of course, is more or less of a speculation under almost any circumstances, but it wasn't enoug of a speculation to satisfy the latent gambling fever in this man-the fever that he had smothered all these years -so when he began to get an income from common stock be cut loose. Every cent his common stock has brought in he has invested in purely speculative ventures

"Today, as a result of his systematic saving and investment of \$1,000 a year for twenty years, this man has from his first class investments bonds worth \$20,000 or more, from his secand preferred stock worth easily \$12.-500 and from his third common stock that in any normal market he could sell for, say, \$6,000, all together bringing him in a liberal and steady income. In addition, he has his purely speculative investments, and they are worth perhaps all told \$20,000. Thus our friend is worth nearly \$60,000 in income bringing securities.

"Even if his speculative purchases had resulted in a total loss he would still have bonds and stocks bringing him in a comfortable return. He would have gratifled his eraving for speculation without anything approaching complete disaster.

'Now he's started a new cycle-a sec ond series. He's canny. All the mone he gets from his fourth line of invest ments mining stocks and so forthhe puts into bonds. Otherwise, he hasn't changed his plan a particle Bonds yield him preferred stock, that in turn dividend paying common stock that in its turn speculative nondivi dend paying securities, and those, when they begin to pay, more bonds. It's an endless chain, an unbeatable system Anybody who can save money can nake it produce, and it isn't necessury to have \$1,000 to spart."

Heart to Heart Talks

THE CASE OF FABRE.

By CHARLES N. LURIE

Consider now the case of Jean Henri Fabre, the French entomologist. For eighty years and more he obeyed the Biblical injunction and went to the ant and studied her ways, although he the present war. Many of the Boers was not a sluggard. He became wise in the ways of the ant and of the other Union of South Africa face a period of

in standard reference books not yet ten years old his name is not mentioned, although Darwin, who died in 1882, called him an "incomparable observer," and Maeterlinck, who made the "Life of a Bee" a romance, credited him with the inspiration of that masterpiece of literature and scientific observation.

Now the world honors Fabre, and not to know of him is to confers ignorance of current magazine literature of the better sort. Then only the illuminati, the enlightened, could identify him. Fame came to him very late in life.

Like Lincoln, who was born only fourteen years before Fabre, the latter read his first books in the fields and by firelight. Again, like Lincoln, he never studied at any college. Fame came to him later in life than it did to Lincoln, but he has lived many more years than were allotted to the American.

It is recorded of Fabre that he is "without university degrees, without laboratory experience under expert direction and almost without education, yet little by little he absorbed all that the world had to offer on the subject of insects by reading scientific reports from the great educational centers and books, and he learned other languages than his own that he might read more reports and more books."

For recreation he wrote poetry. It ger of the Boer uprising became acute is true poetry, for a man so imbued with the sense of the teeming life of the world can write only that sort.

It was only about three years ago that the world awoke to the fact that in a little French village lived one of its greatest scientists, old and neglected. It proceeded to pay honors to him and would have given him money, but the old man said. "I have enough."

He had not sought fame, but at the end it sought him. He is a very, very old man. The recognition can mean little to him now. But the world honors itself in honoring the man who could wait pat' atly for the praise that was his due.

There is a lesson in his life for the impatient and the headstrong. If your work is worthy the world will find you and crown it. Collisions at Sea.

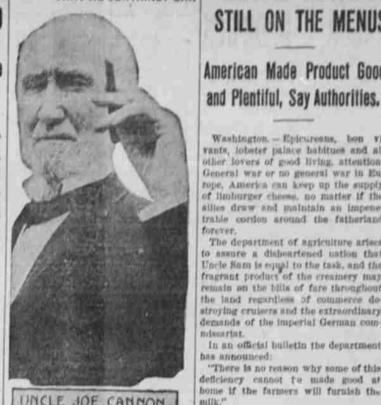

About 50 per cent of the losses of vessels and life at sea are caused by collisions.

Laughed and Won. When the British were storming Badajoz the Duke of Wellington rode up and, observing an artilleryman particularly active, inquired the man's name. He was answered "Taylor."

"A very good name too," said the dake. "Cheer up. my men! Our Tayfor will soon make a pair of breaches

in the walls!" At this sally the men forgot their danger, a burst of laughter broke from Lots of men know a good thing the them and the next charge carried the minute the other fellow sees it first. fortress.-London Answers.

Game Case Dropped When Justice Eats All The Evidence

For the reason that Justice of the Peace Davidson, of Osweno, ate the evidence the case against a Portland hunter, charged with violating the same laws, has been dropped by Disrict Attorney Hodges.

The arrest was made recently by a deputy game warden. The names of the hunters were given with the justice along with two plump pheasants, as evidence, until the following day when the men were to face trial Justice Davidson deposited the birds in the family pantry, but further thought on the eating qualities of birds in general and two fat pheasants in particular developed an appetite which affected the justice, a hearty enter, body, mind and soul. The thought of a tempting dish, two brown birds cooked to a turn by his wife, who he considered an expert in domestic science, overcame him at last and for supper on the night of the arrest the pheas-ants decked the Davidson table.

The warden in the meantime in-formed District Attorney Gifbert Hed-ges of the case and the official planned the prosecution. The first step was to call Justice Davidson, when he learned the facts in the case it was

COAST SEASON LONGER

THREE CLASS AA WINNERS MAY PLAY IN SOUTHLAND

PORTLAND, Ore., Nov. 7,--One of he reasons that the Pacific Coast league season is advanced one week next year, according to Judge McCredie, is

to make possible a scheme which has been considered seriously lately. The question of a post-season series of games between the Coast league pennant winners and those of the In-ternational league and American associations has always been turned down because of the fact that the eastern clubs always closed their season so much earlier that it was found im-possible to keep them together until the coast race had finished.

By closing one week earlier it will bring the season more in line with those of the two other class AA circuits, and such a plan could be worked out to advantage.

The scheme which was considered and approved at the last meeting of the Coast league directors would be to have the pennant winners of the three class AA leagues and a fourth team, composed of Pacific Coast league stars, which would play out a six weeks' schedule after the close of the coast circuit.

It would be possible to arrange this playing the games in San Francisco and Los Angeles, and such a series ought to draw well and be a winner financially.

There would be enough of an objective in sight to make it worth the while of all the players to compete, and the Coast lengue magnates are going ahead with the idea, believing that it can be worked out along these lines.

The Coast season will close on October 17 next year, which is only a little more than a fortnight later than the time the other circuits close. By the time they could arrive on the Coast they wouldn't have to wait long before they could start in the first game of the series.

PRINCETON IS DOWNED BY A 20 TO 0 SCORE

CAMBRIDGE, Mass., Nov. 7 .- Harvard defeated Princeton with a 20 to score here this afternoon.

Two years ago Harvard won from Princeton for the first time in 23 years. Last year Harvard won again. Har-vard was a slight favorite in the betting, but a large body of Princeton backers arrived today and the odds dwindled to nearly even money. The line-up was:

Princeton. Harvard. Highley L. E. . . T. J. Coolidge McLean......L. T. Parson Shank L. G. Gennert.....C. Bigelow E. Trenkamp...R. G. Pennock Ballin......R. T......Trumgull Shea......R. E.....Hardwick
 Ames
 Q
 Logan

 Glick
 L. H.
 Mahan

 Tibett
 R. H.
 Bradlee
 Driggs......F..... Francke Neither team had been defeated this fall, although each had been held to a tie. Since 1877, when Harvard and Princeton began playing intercollegi-ate football, the Tigers have won 12 games to Harvard's five, the crimson

having won the last two contests.

The crowd was slow in arriving, but flocked to the stadium in the last 30 minutes before the game and when play started the structure was filled.

VIOLATORS OF TRAINING RULES ARE TAKEN FROM SQUAD

Violation of training rules is responsible for a shake-up on the Estacada high school football team, according to the Progress. In the last issue of that paper, the situation is explained: 'Next Saturday afternoon at 2:30

Estacada grounds.
"Owing to an infringement of the training table rules, Principal Ford was compelled to expel from the squad several of the regular players, and their absence will prove a handicap for the locals. It is understood that the lineup will comprise a good aggregation and some new gridiron stars may be brought to light."
