OREGON HOP OUTLOOK IS CONSIDERED POOR

PORTLAND, Ore., Nov. 16.—Trading in the hop market is at very low ebb. England is not inclined to take hold of supplies except at prices even below those at present ruling here. One local exporter offering a lot of ordinary goods abroad at a very low price, but was surprised this morning to receive an answer at 1 1/2c a pound less. It is doubtful if England has purchased up to this time 5000 bales of hops in Oregon this season, while last year estimated sales ranged from 20,000 to 40,000 bales.

There seems to be a slight revival in the demand for poor, cheap goods in the American trade at this time with very low prices in effect. Good quality
