BERLIN PROFESSOR PREDICTS ISOLATION OF GREAT BRITAIN. ROTTERDAM, April 7.—Professor Maximilian Harden in his latest lecture at Berlin on the course of the war said: "Our chief enemy, England, has, it is true, not yet received any mortal wound, but the greatest danger is threatening her from our submarines. As soon as we have succeeded in extending the radius of action of the four bigger submarine types they can be used for lavish laying of mines. "On that day the island kingdom will find itself surrounded by a new circle of mines, and her mastery of the sea will be at an end. In everything Germany can have confidence. After eight months of tremendous struggle, it is true, it is not standing as conqueror, but its power is untouched." A description of the Germans' new submarines from an authoritative source says that they displace 900 tons of water when fully submerged and have two Diesel engines capable of developing 900 to 950 horsepower.

ROTTERDAM, April 7.—Professor Maximilian Harden in his latest lecture at Berlin on the course of the war said: "Our chief enemy, England, has, it is true, not yet received any mortal wound, but the greatest danger is threatening her from our submarines. As soon as we have succeeded in extending the radius of action of the four bigger submarine types they can be used for lavish laying of mines. "On that day the island kingdom will find itself surrounded by a new circle of mines, and her mastery of the sea will be at an end. In everything Germany can have confidence. After eight months of tremendous struggle, it is true, it is not standing as conqueror, but its power is untouched." A description of the Germans' new submarines from an authoritative source says that they displace 900 tons of water when fully submerged and have two Diesel engines capable of developing 900 to 950 horsepower.
