You Can't Get Blood SHEEP RECEIPTS IN Out of a Turnip

Neither can you get your moneys worth out of a binder that hasn't had it hammered and built into it at the factory. A good way to find out about a binder is to look it over carefully and see if it measures up to your idea of what the machine should be. Another good way is to ask those who have used the machines. If we didn't have the fullest confinence in our machine we wouldn't advise you to do this but as it is we will be mighty well pleased if you will ask every person you know who owns a Champion Binder, how he likes it.

THE CHAMPION

like all Champion Machines is built upon the "quality first" policy and then it, also has some very important advantages, for instance it's positive force feed elevator which insures a continuous flow of grain to the picker arms. The Relief Rake which prevents bunching at the inner end of the platform. The Champion also has many other good strong features which we will gladly show you if you will call on us.

NEED ANYTHING IN PUMP OR WATER SUPPLY GOODS?
