MAN WHO WAS OWN ATTORNEY AND WON NOW AFTER \$10 FEE

ITEM IN BILL OF COSTS FILED BY WILLIAM LILLIE GAUSE OF MANY DEBATES.

If a man tries his own case as his own attorney and wins, is he entitled to attorney's fees?

This question, raised Tuesday by William Lillie, a farmer who won a suit for \$150 in the circuit court Saturday is hithering local attorneys and the cause of many debates here. SHERIFF LOSES DOG; LOOKS FOR THIEF

PET OF WILSON FAMILY BELIEVED TO HAVE BEEN STOLEN BUT TRACE NOT FOUND.

Rob, a pet dog of the W. J. Wilson family, is lost, strayed of stolen and Sheriff Wilson is inclined to think that the animal has been stolen. The dog is a large pointer and when last seen had a collar and license tag. He answers to his name and is highly valued by the sheriff and his family.

While definite proof that the animal was deliberately taken is lacking, members of the family are satisfied that he was stolen. He was last seen several days ago, and a quiet search has failed to reveal a trace of the missing animal.

The loss of Sheriff Wilson's pet dog is the second more or less unusual example of thievery in Oregon City in the last week. L. Ruchonich, recently saw a woman, who was accompanied by a man, pull up three rose bushes in his parking and walk off. By the time he reached the sidewalk they were out of sight, but he believes he knows who took the bushes.

MEMBERSHIP RACE OF SCHOOL ENDS

The Beaver Creek Union Sunday school held one of its happy times socials in the Orange hall Saturday night, November 19. The event was the final student of an attendance contest between the men and boys and the women and girls of the Sunday school in a "race by ship" to the San Francisco fair, the women and girls winning out, so the men gave the supper—a sumptuous feast of oysters and other good things prepared by the men.

Before the supper there was a short program followed by games and a grand march.

Each side was represented by a poet, an artist and a historian. Mr. Romig, who is president of the Clackamas County Sunday School association, and Mrs. McDonald, who has in charge the teenage girls movement, were the guests of honor and both gave short talks.

Chris Murali, of Maple Lane, rendered some delightful guitar music, accompanied by Mrs. Mayfield.

Everyone was surprised and delighted with Arthur Lindsey's picture of the trip of the men's ship, the Great North-ern. It showed unusual skill for a boy of 15 years. The women had a song about their ship, the Turtle.

The women voted the supper a great success and hoped the men would serve the supper every time the Sunday school had a social gathering.

METHODS TO PUT TO USE ALL OF APPLE BEING WORKED OUT

J. P. KELLY STUDIES PROCESSES TO MAKE WIDE VARIETY OF THINGS FROM FRUIT.

Methods whereby apples wasted will be put to profitable use are being studied by J. P. Kelly, of Reimers & Kelly, of this city. Mr. Kelly said that in Oregon alone \$1,000,000 worth of apples were wasted each year by the farmers, but through processes now being studied by him the farmer could find a good market for this fruit, even that of the crop which was defective.

Mr. Kelly outlined his work in a general way Monday. Through chemical processes, he aims first to take out the jelly making properties of the apples, then the albumen, then the seeds and finally the cellulose. From these substances, a number of products can be made, ranging from a high grade of paper from the cellulose to jelly from the first substances removed. Albumen can be made into several kinds of foods and he is now studying the uses to which the seeds can be put.

Mr. Kelly has been at work upon a more complete and varied use of fruits, particularly apples for years and his research work is considered complete. However, he said that much remained to be done. He would describe his studies only in a general way.

At the present time, Reimers & Kelly are making a high class chicken food from salmon eggs. Their plant here is turning out about 500 pounds of chicken feed daily from a ton of eggs secured from canneries. Through a process worked out by Mr. Kelly, the plant is used every spring to make chicken feed and a high class of leather tanning and harness oil from eels, which are caught here each spring in great quantities.

He is a pioneer in this work, and has found a paying business in handling that which others have considered useless. Salmon canneries will shut down two months in the middle of winter and Mr. Kelly will devote all his time to the study of the products of apples.
