MEXICAN CALLS "PECULIAR NAT URAL&CONDITIONS" HIS COUNTR Y'S DEFENSE

"All the good people of both countries ought to get together and work for peace, for war, if it comes, will be hell on earth while it lasts, and it will last a long time," Andres Garcia, the Mexican consul at El Paso, said. The United States will have to face a united people and a people determined to fight to the last ditch," he continued. "Besides, we have more than 200,000 veterans, trained to a style of warfare that makes the best use of our peculiar natural conditions. The Americans will encounter heavy losses in exterminating the Mexican people, for that is what the war would be. War would mean a terrific destruction of property in Mexico, as we realize. The estates of the wea'thy reactionaries, who are responsible for the present embroilment, will be turned into deserts. Every means ought to be taken by both sides to avoid this threatened destruction of life and property." Two views of American soldiers in the "peculiar natural conditions" mentioned by Senor Garcia are seen here. They are pletures of American troopers clambering over rocks in northern Mexico and firing from behind sand heaps.
