

CANBY DEPARTMENT

CANBY, Ore., Aug. 24.—Tom Kenney, of Woodburn, was a Canby visitor Saturday. Mrs. M. W. Johnson spent Tuesday visiting Woodburn friends. Harry Garrett, came over from Newberg Saturday, to be present at the dance given by the Canby band.

birthday party. Mrs. James recently pieced two quilts and gave one to the Aid society of the M. E. church, and one to the Christian church. Monday, the ladies of these two societies were invited to spend the day and "quilt the quilts."

CHARLES F. MURPHY

Charles F. Murphy, leader of Tammany Hall, the democratic organization of New York city, and a power in state politics, according to persons who are in his confidence, never again will sit as head of the Tammany delegation in a democratic state convention.

ASIA MINOR. Where Its Borders Lie is a Sort of Geographical Puzzle. "Asia Minor" is a geographical term of vague extension. It would puzzle any one to say exactly where it leaves off.

Ways of the Arab. The Arab has some curious ways. He takes off his shoes when he enters a house, but keeps on his hat. He reads and writes from right to left.

Mr. and Mrs. Chester Smith, of Macksburg, were Canby shoppers Tuesday. Henry and Andrew Kocher went to Aurora Wednesday to attend the funeral of the late Dr. Gelay.

Miss Treda Van Winkle, of Portland, is a guest of her sister, Mrs. Carl Smith. Mrs. George Smith, of Oregon City, visited Sunday at the Pierce home.

Several Canby Rebecas went to Aurora Saturday to attend lodge at that place and assist in infating a candidate. Those who went were: Mesdames Ida Knight, Cassie Evans, Ella Kocher, Mary Kirk and Bertha Hurst.

SIRIUS AND THE DOG DAYS.

The dog days, when excessive heat is supposed to prevail, begin July 3, according to the ancient reckoning, and continue to Aug. 11. All sorts of traditions and superstitions are connected with this period, and various dates are also given.

GOOD FORM IN TENNIS. Don't Copy a Bad Style Because Some Star Player Uses It. Good form in tennis is hard to describe. It is not necessarily the ability to win matches, nor is it always the most graceful way of hitting the ball.

HOPS NEAR AURORA DAMAGED BY STORM. AURORA, Ore., Aug. 15.—Considerable damage to the hop yards in this vicinity is reported as the result of a wind and rain storm which visited this section yesterday.

MONTANA MAY GET OREGON CITY SILICA. Captain Warwick, who headed the Standard Paving company which laid the Main street improvement a year ago, is now in Great Falls, Mont., where he has a contract to lay several miles of hard surface.

ONE GOOD REASON. "Why does the operation of hanging kill a man?" asked Dr. Whately. A physiologist replied: "Because inspiration is checked, circulation stopped and blood suffuses and congests the brain."

ONLY DEEDS GIVE STRENGTH TO LIFE; ONLY MODERATION GIVES IT CHARM.—Jean Paul Richter.

THE ELEVATOR BOY PROTESTS. Did you ever stop to consider the feelings of an elevator boy in an office building? "How'd you like to spend your days in a cage, goin' up, comin' down, same bad air, same old shafts slippin', never nothin' to see? How'd you like to play baseball?"

A STRONG WILL. "Rastus," said the judge, "you say that you entered the henhouse and then, deciding to resist temptation, left it. Is that right?"

OF COURSE. "Why do you always have to be examined by a doctor before you can get life insurance?" "I presume the company is anxious to know whether or not you are strong enough to carry it."—Detroit Free Press.

BETWEEN GIRLS. "She says she wishes she could see herself as others see her." "That's just an excuse for spending a lot of time in front of a mirror."—Louisville Courier-Journal.

SURE REWARD OF PATIENCE. Never ask a woman for her reasons. If you will only keep still and wait awhile she will give them to you.—Boston Transcript.

ON THE FARM AND GARDEN

SPRAYING VINES.

In spraying the under side of the squash leaves where the black aphids hide, feeds and breeds in greatest numbers, the O. A. C. Press Bulletin editor, who practices labor-saving devices in his back-yard gardening, turns the vines over by taking up the end of each runner and carrying it back over the center of the hill. This inverts most of the leaves for a thorough drenching without undue loss of labor and material.

NEW BULLETIN ISSUED ON HANDLING FRUIT CROPS.

As part of the campaign for better methods of handling and marketing the Oregon fruit crop, a bulletin on the physical handling of fruit and the organization of the Oregon fruit industry has been issued by the Agricultural College extension service and is now ready for distribution.

HERE'S A CHEAP FEED CROP.

Last season a farmer realized about the first of August that he was going to be short of feed for the winter. He couldn't see where he was going to be able to buy feed either, and was just getting a nice start in cattle that he didn't want to sell.

He figured that there was time enough to raise feed, so he disked a piece of old stubble up, after a rain, and sowed a mixture of all kinds of grain out of his granary, with which the land was sowed.

The crop went succotash a few better as a mixture. In addition to corn and soy beans, there were peas, oats, millet and rye. But it grew well and made several loads of fine feed.

Maybe some one who reads this would like to try the same thing.

WHEAT DECLARED TO LEAD POULTRY FOODS

MICHAEL K. BOYER DESCRIBES MERITS OF THE VARIOUS CHICKEN FEEDS.

(By Michael K. Boyer.) Corn, wheat and oats, with their by-products, corn meal, gluten meal, bran, middlings and oatmeal (or ground oats), are the chief articles in the rations adopted by American poultrymen.

Gluten meal and feeds are the by-products in the manufacture of starch and glucose from Indian corn. In other words, that portion of commercial shell corn that remains after the separation of the larger part of the starch, the germ and the bran by the processes employed in the manufacture of corn-starch and glucose. It is a very digestible protein concentrate.

Wheat stands at the head of the poultry grains. It is the most nearly complete and well-balanced. It contains less oil but more protein and starch than does corn. The by-products—bran and middlings—are of more value, pound for pound, than the whole grain. Wheat bran consists, mostly of the outer coverings of the wheat kernel, and a good quality should contain at least 15 per cent of protein.

Wheat bran is only 62 per cent digestible.

MID-SUMMER SPRAY BEST FOR BROWN ROT

THIS IS TIME OF YEAR TO FIGHT PRUNE DISEASE AND METHOD GIVEN.

(By O. H. Elmer.) Commercial lime-sulphur, one to fifty, or bordeaux mixture, four-to-fifty, are the two sprays which at present can be most safely recommended for the control of brown rot of prunes, and either of these sprays if applied properly, offers a very satisfactory protection against this disease.

In western Oregon the most important spray of the year in the control of prune diseases is the mid-August spray for brown rot. This disease usually causes its greatest damage from about the middle of August to the time when the prunes are picked. It is during this period that it is the most important to have a protective fungicide covering the prunes as a guard against the brown rot organism.

In applying the mid-August spray for the control of brown rot it is very important that all the fruit be covered with a coating of spray. It should be borne in mind that the object of the spray is to prevent any germinating brown rot spore which may have been carried to the surface of the fruit from penetrating into the fruit and thus infecting it. It is thus necessary to spray thoroughly, for the more completely the fruit is covered with a coating of the spray the greater is the protection against brown rot.

A resin fish-soap should be used with bordeaux mixture to cause the spray to spread evenly over smooth surfaces, since without the soap the spray gathers in droplets. The spreader is prepared as follows:

- Resin 5 pounds
Fish oil 1 pint
Common lye 1 pound
Water 5 gallons

Either all or a fraction of the formula can be made up at one time. Any high grade lye can be used. A large iron kettle can be used or if only a small amount of soap is to be made a common galvanized pail.

Where fish oil cannot be obtained it is possible to substitute an equal amount of cotton seed oil or raw linseed oil. These oils are probably not so good as the fish oil, and are more expensive.

MRS. A. M. WHITE WIRES HER MOTHER IS DEAD

Word was received in this city Friday night from Mrs. A. M. White, in Paonia, Colo., stating that her mother, Mrs. Martha Culter, had died there Friday morning at 7 o'clock. Mrs. White left this city several weeks ago for the Colorado city to be at the bedside of her mother. Mrs. Culter was 74 years of age and death was due to dropsy and old age. She visited in this city about ten years ago, and has several friends here. Mrs. White also says that her brother is also seriously ill, being affected with paralysis. She intends to stay in Colorado for some time and care for her brother.

A Good Time Coming!

Everybody come to see the three act play given for the benefit of the Sweet Briar Baseball team. It will be given in— GEO TIEDEMAN'S NEW BARN Mountain Road District AUGUST 12TH AT 8 P. M.

All girls bringing baskets will be admitted free; others 15 cents; children under 10 years free. SOCIABLE TIME LATER. ALL COME!

Rubber Stamps

Our Rubber Stamp Department is prepared to turn out your orders for special stamps on short notice.
