CHAR PIT METHOD USED TO CLEAN LIBERAL LAND

RICHARD WRIGHT FINDS PLAN IS SUCCESS-DRAGSAWS

ARE BUSY.

LIBERAL, Ore., Dec. 14 .- (Special.) -This neighborhood has Chris Dooplebb to thank for dragging the road between his home and the Willamette Valley Southern depot, as the work was done without expense to the dis-

Three dragsaws are at present in a strip of timber belonging to Richard Wright. They belong to H. W. Witzke, D. W. Badger and Will Renolds.

Weather conditions were somewhat varied by the first fall of snow last week, and a faint hearted silver than It was, however, sufficiently "nipping to send the wood cotters to various towns for rainproof garments.

Richard Wright has been experimenting with the char pit method of clearing stumps from land. His venture seems to be meeting with success. The Liberal road, northeast of Lib eral school, has been greatly improved by the deepening of the drainage

Will Renolds was in Portland the past week.

H. N. Witsife helped Chris Doeplebb build a small barn to shelter stock belonging to the latter. Wm. Hines has been hauling grain

to Liberal recently Mr. Balasca hauled potatoes to Liberal the past week.

Mrs. H. N. Wagoner has been suf fering from rheumatism since her return from Portland.

George Stier and brother are doing some trapping this winter, consequently there will be fewer civit cats molesting poultry yards.

Two litt'e Liberal girls have entered school recently. They are living at the Frederick's home at present. J. Wilson is splitting wood on the

Richard Wright property, as are also Fischer brothers and Dick Renolds. Mrs. H. N. Mitzke entertained a number of guests who visited at her home last Saturday.

Richard Wright visited the county court in behalf of this road district one day last week. Mr. Wright, as do many others, believe that this road is entitled to permanent graveling. It has been stated that some of the heavlest traffic in the county passes over this mile of road.

More than seventeen hundred cords of wood, several cars of hogs, potatoes and grain, three butcher wagons, many automobiles and other vehicles pass over it the past summer and until the road became nearly impassable this winter. The last automobile to attempt the feat became fast. Many hundreds of cords of wood will have to await better condition of roads before it can be hauled to market

This bit of road is directly tributary to the Willamette Valley Southern depot, though it is used by all who have occasion to go to the Southern Pacific depot, Liberal, Mulino or Mo-

Onk Grove school has a spelling match every other Friday. Next Friday evening will be the next. A director will have to be elected

Will Gaffie is working for Chris Doeplebb splitting wood. He will

Richard Wright has gone away to visit relatives for a few days.

25c PER MONTH IS THE AVERAGE COST OF OPERATING A MITCHELL WATER SYSTEM

BANISH THE BUCKET BRIGADE! The Water Bucket Must Go. It is a back breaker, a back number and a useless consumer of energy. Think how many miles of steps your wife is obliged to take each day because she does not have the advantages of water under pressure. Is it any wonder that she is dog tired each night. The useless waste of energy in lifting a heavy water bucket each time a little water is needed, the endless trips to the well or spring, these are the things that make for physical breakdowns.

Think of the chance of your water becoming contaminated and the health of your family destroyed.

Think of the danger of fire, a fire that a steady stream of water will quickly kill but when this is not at hand will greedily consume your home, your property and possibly a life. These things can't be thought of in the terms of dollars but the fact is that YOU'LL GET YOUR MONEY'S MITCHELL WATER SYSTEM IN MORE WAYS

WORTH OUT OF A No Secret About the Mitchell System

Mitchell System is a simple system, nothing diffi-to understand or operate, about it.
It makes it is because it is
so up of better units. In making our outfits we
the Mitchell Fressed Steel Fraumatic Tank; It's
ad under beavier pressure than you can put on it
guiranteed for 125 pounds; we have only the
EES glass valve seat pumps. If there is a better
p than the Myers, the most critical pump buyers in
rices to not know of it. For power, if a gesuline
ries to not know of it. For power, if a gesuline
to la mesied, we install a Staver, the most dependtibre is, its simplicity will appeal to you at once.

It will make your property more valuable. It will make your family more happy and contented through the enjoyment of the bath, the laundry, the many other conveniences that are dependent upon a supply of running water in the home.

The Mitchell System makes things more convenient in the harnyard and it affords absolute protection against fire by supplying a dependable supply of water under any pressure up to 125 pounds.

It will help preserve the health of your folks, because flothing of foreign nature can get into the water after it has been pumped into the Mitchell Water System.

If your water source is pure, your water will remain pure until it flows from the tap.

The Mitchell Water System furnishes bool water in summer and is proof against freezing in winter. In short, it makes life worth living, and if you will look at the matter from every angle you will come to the conclusion that you simply cannot afford to do without water under pressure in the loose.

W. J. WILSON & CO. Oregon City Agent
