Danger Signal.

If the fire bell should ring would you run and stop it or go and help to put out the fire? It is much the same way with a cough. A cough is a danger signal as much as a fire bell. You should no more try to suppress it than to stop a fire bell when it is ringing, but should cure the disease that causes the coughing. This can nearly always be done by taking Chamberlain's Cough Remedy. Many have used it with the most beneficial results. It is especially valuable for the persistent cough that so often follows a bad cold or an attack of the grip. Mrs. Thomas Beeching, Andrews, Ind., writes: "During the winter my husband takes cold easily and coughs and coughs. Chamberlain's Cough Remedy is the best medicine for breaking up these attacks and you cannot get him to take any other." Obtainable everywhere.

25c PER MONTH IS THE AVERAGE COST OF OPERATING A MITCHELL WATER SYSTEM

BANISH THE BUCKET BRIGADE! The Water Bucket Must Go. It is a back breaker, a back number and a useless consumer of energy.

Think how many miles of steps your wife is obliged to take each day because she does not have the advantages of water under pressure. Is it any wonder that she is dog tired each night. The useless waste of energy in lifting a heavy water bucket each time a little water is needed, the endless trips to the well or spring, these are the things that make for physical breakdowns. Think of the chance of your water becoming contaminated and the health of your family destroyed. Think of the danger of fire, a fire that a steady stream of water will quickly kill but when this is not at hand will greedily consume your home, your property and possibly a life. These things can't be thought of in the terms of dollars but the fact is that

YOU'LL GET YOUR MONEY'S WORTH OUT OF A MITCHELL WATER SYSTEM IN MORE WAYS THAN ONE

No Secret About the Mitchell System

The Mitchell System is a simple system, nothing difficult to understand or operate about it. The reason it gives better service is because it is made up of better things. In making our units we use the Mitchell Pressed Steel Pneumatic Tank; it's tested under heavier pressure than you can put on it and is guaranteed for 125 pounds; we use only the MYERS glass valve seat pumps. If there is a better pump than the Myers, the most critical pump buyers in America do not know of it. For power, if a gasoline engine is needed, we install a Motor, the most dependable there is. Its simplicity will appeal to you at once. More than 3,000 units in the Northwest say it's a "good" engine, and so it is. The fact, too, that our units are made up to suit your requirements; we don't attempt to make our equipment suit our outfit. Write us and we will tell you how we do it.

It will make your property more valuable. It will make your family more happy and contented through the enjoyment of the bath, the laundry, the many other conveniences that are dependent upon a supply of running water in the home. The Mitchell System makes things more convenient in the barnyard and it affords absolute protection against fire by supplying a dependable supply of water under any pressure up to 125 pounds. It will help preserve the health of your folks, because nothing of foreign nature can get into the water after it has been pumped into the Mitchell Water System. If your water source is pure, your water will remain pure until it flows from the tap. The Mitchell Water System furnishes cool water in summer and is proof against freezing in winter. In short, it makes life worth living, and if you will look at the matter from every angle you will come to the conclusion that you simply cannot afford to do without water under pressure in the home.
