OSWEGO, Ore., Jan. 25.—(Special)—On Saturday afternoon, Jan. 20, the Methodist Sunday school class of young women, whose teacher is Mrs. Ernest Neal, and the corresponding class of the Congregational Sunday school, whose teacher is Mrs. Sinclair, both met, with their teachers at the home of Mr. and Mrs. A. A. Crago, to spend as nearly as could be arranged, an afternoon in Chinese surroundings.

When all of the twenty-two guests had arrived, an hour and a half was pleasantly spent in showing and describing the curios, which Mr. and Mrs. Crago had brought with them from China. There were some little wood carvings, which clearly illustrate many different phases of Chinese life and customs, several pieces of dainty fancy work, old vases, and other things of interest.

Then the rice began to boil, and all were seated with chopsticks before them. It would be difficult to describe the gay hour that followed, with all the attempts at conversing in Chinese, then trying to be mannerly, according to Chinese etiquette, and many laughable and discouraging attempts to get noodles, gravy, and bits of meat and vegetables, twelve different kinds in all, safely started on the way down to their curious appetites. The party broke up about five o'clock, after all had thoroughly enjoyed the afternoon.

25c PER MONTH IS THE AVERAGE COST OF OPERATING A MITCHELL WATER SYSTEM

BANISH THE BUCKET BRIGADE! The Water Bucket Must Go. It is a back breaker, a back number and a useless consumer of energy.

Think how many miles of steps your wife is obliged to take each day because she does not have the advantages of water under pressure. Is it any wonder that she is dog tired each night. The useless waste of energy in lifting a heavy water bucket each time a little water is needed, the endless trips to the well or spring, these are the things that make for physical breakdowns. Think of the chance of your water becoming contaminated and the health of your family destroyed. Think of the danger of fire, a fire that a steady stream of water will quickly kill but when this is not at hand will greedily consume your home, your property and possibly a life. These things can't be thought of in the terms of dollars but the fact is that

YOU'LL GET YOUR MONEY'S WORTH OUT OF A MITCHELL WATER SYSTEM IN MORE WAYS THAN ONE

Water when you want. Where you want it.

It will make your property more valuable. It will make your family more happy and contented through the enjoyment of the bath, the laundry, the many other conveniences that are dependent upon a supply of running water in the home.

The Mitchell System makes things more convenient in the barnyard and it affords absolute protection against fire by supplying a dependable supply of water under any pressure up to 125 pounds.

It will help preserve the health of your folks, because nothing of foreign nature can get into the water after it has been pumped into the Mitchell Water System.

If your water source is pure, your water will remain pure until it flows from the tap.

The Mitchell Water System furnishes cool water in summer and is proof against freezing in winter. In short, it makes life worth living, and if you will look at the matter from every angle you will come to the conclusion that you simply cannot afford to do without water under pressure in the home.
