## MACKSBURG.

The constant rain seems trying to indemnify us for making our gardens late, by bringing forward the pasture, thus increasing the dairy output.

Young chickens are much earlier than usual. Broods of the tiny fowls are peeping everywhere over the ranches and are thriving notwithstanding the rain. The wheat is growing at a pace that is more gratifying in view of its high price.

The fruit trees look as if certain to yield a bountiful crop, though they are keeping the buds still in their winter wrappings. The woods are full of spring treasures. It is hard to walk without stepping on the purple violet and everywhere the Oregon grape is displaying its masses of crimson and gold.

The rose-bushes are putting out their wealth of leaves looking full of the vigor the promises to reach profusion.

Is your child pale and fretful? Does he cry out in sleep or grind his teeth? These symptoms may mean worms and you should obtain relief at once. It has certainly proved of vast value to the coast artillery, which as a second and third line of defense will be entrusted with the defense of New York. The first line is the navy, the fourth is the mobile army.

Newport, R. I. The seat of a torpedo factory, a mine base, fuel station, munition magazines, the naval war college and other departments of high naval importance, was formally transferred from the control of Collector of Customs Fitzsimmons to Rear Admiral Austin M. Knight. The latter immediately set about protecting the harbor and the entire Narragansett bay naval district against any emergency.

Mines were collected at Fort Greble and Adams ready for distribution in the waters of the harbor approaches. Every strategic center was placed under double guard, the public was refused admission and troops refused leave of absence except in special instances. Officers received what is known as the "mobilization slate" indicating the posts which they will be called upon to fill in the event of an actual mobilization order.

The naval torpedo factory was especially busy. Extra time by workers and operation in shifts have been ordered, while efforts were made to recruit 400 additional machinists. Three torpedo boat destroyers, with a full quota of torpedoes, are protecting the factory and ready at the same time to perform such other duties as the com-

rock crusher at the south end of Bakers bridge.
