The Stover Gasoline Engine

Is Ready for Work

THE STOVER ENGINE is an ideal farm power. More than that it is a practical farm power. The Stover Engine is simple and strong. It has few parts. Take the cut of the Stover shown here and compare it with the picture of any other engine on the market. Compare the engines themselves if you can. Note the difference. Notice that the Stover is stronger and better in every detail. Now, why don't you get next to the fact that you are cheating yourself by not owning one of these engines? Everyday you are doing lots of work that could be better and more cheaply done by a Stover Engine. Get the idea that an owner of a gasoline engine has to be an engineer out of your head. He doesn't—that is, if his engine is a Stover. A few minutes instruction will make you able to operate your Stover as an old hand. That's why we say that the Stover is an ideal farm power. It is made right. It is giving satisfaction to 3500 users right here at home in Oregon, Washington and Idaho. We sell them in sizes ranging from one to sixty horse power.

WE ASK ONLY THE OPPORTUNITY TO SHOW YOU WHAT THE STOVER WILL DO FOR YOU

The Oregon Jersey Cattle club has a lady speaker on their program, Mrs. F. E. Lynn, of Perrydale. The women of Oregon are demonstrating their ability in this field of agriculture. The recent International Stock show at Chicago has proven beyond doubt that women can breed just as excellent animals as the men. Many women of the rural district will soon have an ample opportunity to demonstrate their ability in this field. The motherly love that a woman possesses makes for her advantage in this field. Women generally are more painstaking in their care of stock than men. A woman will raise an animal that a man would let die.

AMERICAN BULLET EFFECTIVE.

WITH THE AMERICAN ARMY IN FRANCE, Dec. 25.—The German soldier's armor will not withstand the hard hitting American bullet, it has been shown. Even the bullets from an automatic pistol did the work it was expected they would in this respect.
