SHIPBUILDING NOT TO BE STOPPED IF PEACE IS DECLARED

WASHINGTON, Nov. 1.—Shipbuilders in American yards who may fear their efforts to provide an emergency fleet are limited by the necessities of war were assured that there would be plenty of work for them for years to come, in statements addressed to them today by Chairman Hurley of the Shipping Board and Director-General Schwab of the Emergency Fleet Corporation. Every efficient yard will continue to have all the work it can do whether the war ends soon or not, Mr. Hurley said, while Mr. Schwab warned shipworkers that if Germany were not shivered in her peace overtures it could want nothing better than a slackening of efforts by American shipbuilders.

"The present program calls for 16,000,000 tons of merchant ships," said Mr. Schwab in his statement. "Today we have built only about 2,500,000 tons and we will not have completed our program until six times as much work has been done." Mr. Hurley pointed out that the ending of the war could not bring an end to the world's needs for ships "nor prevent us from carrying out our program to a successful conclusion." "I can say with frankness," said Mr. Hurley, "that our shipyards will be kept going to their capacity and they must not let up. The inefficient plants which have been permitted to operate because of the war emergency and the immediate need of ships will, as a matter of business expediency, drop out when the emergency is removed. Efficient yards will be encouraged and supported, because we can depend upon them to carry out their promises and produce ships economically. The work inefficient yards cannot do will fall to other plants. We will look to the West coast to continue the pace it has maintained and the yards of the East and South and in the Great Lakes region to increase their output."
